

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2000-25-10 Airbus Industrie: Amendment 39-12045. Docket 2000-NM-154-AD.

Applicability: All Model A300 B2 and B4 series airplanes, and Model A300 B4-600, A300 B4-600R, and A300 F4-600R (A300-600) series airplanes; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent cross connection of the hydraulic hoses or pipes that supply the main strut unlocking actuator, which could lead to consequent collapse of the main landing gear (MLG) under lateral taxiing loads, accomplish the following:

Corrective Actions

(a) Within 1,000 flight hours or 3 months after the effective date of this AD, whichever occurs first: Verify the correct location of the labels of the hydraulic pipes supplying the strut unlocking actuator of the left-hand MLG, and of the pipes of the left- and right-hand cross brace, and reidentify the pipes, in accordance with Airbus Service Bulletin A300-32A0437 (for Model A300 series airplanes) or A300-32A6080 (for Model A300-600 series airplanes), both dated April 5, 2000, as applicable. If any label is located incorrectly, prior to further flight, replace the label with a new label in accordance with the applicable service bulletin.

Note 2: The service bulletins reference Airbus Service Bulletins A300-57A0234 and A300-57A6087, as well as Messier-Dowty International Service Bulletin No. 470-32-792, as additional sources of service information for accomplishment of the specified actions.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM-116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM-116.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM-116.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(d) The actions shall be done in accordance with Airbus Service Bulletin A300-32A0437, dated April 5, 2000; or Airbus Service Bulletin A300-32A6080, dated April 5, 2000; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 4: The subject of this AD is addressed in French airworthiness directive 2000-204-309(B), dated May 17, 2000.

Effective Date

(e) This amendment becomes effective on January 25, 2001.

Issued in Renton, Washington, on December 11, 2000.

Donald L. Riggan,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120-AA64

Airworthiness Directives; Boeing Model 747 Series Airplanes Powered by Pratt & Whitney JT9D-3 and -7 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects a minor error that appeared in airworthiness directive (AD) 2000-23-16, that was published in the **Federal Register** on November 21, 2000 (65 FR 69862). The error resulted in a reference to a part number that does not exist.

That AD is applicable to certain Boeing Model 747 series airplanes, and requires repetitive inspections and torque checks of the hanger fittings and strut forward bulkhead of the forward engine mount and adjacent support structure, and corrective actions, if necessary. That AD also provides for optional terminating action for the repetitive inspections and checks.

EFFECTIVE DATE: Effective December 6, 2000.

FOR FURTHER INFORMATION CONTACT:

Tamara Anderson, Aerospace Engineer, Airframe Branch, ANM-120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-2771; fax (425) 227-1181.

SUPPLEMENTARY INFORMATION:

Airworthiness Directive (AD) 2000-23-16, amendment 39-11988, applicable to certain Boeing Model 747 series airplanes, was published in the **Federal Register** on November 21, 2000 (65 FR 69862). That AD requires repetitive inspections and torque checks of the hanger fittings and strut forward bulkhead of the forward engine mount and adjacent support structure, and corrective actions, if necessary. That AD also provides for optional terminating action for the repetitive inspections and checks.

As published, the amendment contained a minor error in Note 4 which identifies installation of two "BACW10BP* auxiliary power unit" washers. However, this part number does not exist, the correct part number is "BACW10BP*APU." The letters "APU" were inadvertently defined as an acronym meaning "auxiliary power unit." In all other respects, the original document is correct.

Since no other part of the regulatory information has been changed, the final rule is not being republished.

The effective date of this AD remains December 6, 2000.

§ 39.13 [Corrected]

On page 69864, in the third column, Note 4 of AD 2000-23-16 is corrected to read as follows:

2000-23-16 Boeing: Amendment 39-11988, Docket 2000-NM-329-AD.

* * * * *

Note 4: Installation of two BACW10BP*APU washers on Group A fasteners accomplished prior to the effective date of this AD in accordance with Boeing Service Bulletin 747-54A2159, dated November 3, 1994, Revision 1, dated June 1, 1995, or Revision 2, dated March 14, 1996; and pin or bolt protrusion as specified in the 747 Structural Repair Manual, Chapter 51-30-02 (both referenced in Boeing Alert

Service Bulletin 747-54A2203, dated August 31, 2000); is considered acceptable for compliance with the terminating action specified in paragraph (b) of this AD.

[Airspace Docket No. 00-ACE-31]

Amendment to Class E Airspace; Dexter, MO; Correction

AGENCY: Federal Aviation Administration, DOT.

ACTION: Direct final rule; confirmation of effective date and correction.

SUMMARY: This document confirms the effective date of a direct final rule which revises the Class E airspace at Dexter, MO, and corrects an error in the Class E airspace description as published in the **Federal Register** on September 29, 2000 (65 FR 58343), Airspace Docket No. 00-ACE-31.

EFFECTIVE DATE: 0901 UTC, January 25, 2001.

FOR FURTHER INFORMATION CONTACT: Brenda Mumper, Air Traffic Division, Operations and Airspace Branch, ACE-520A, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust, Kansas City, MO 64106; telephone: (816) 329-2524.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 00-24933, Airspace Docket No. 00-ACE-31, published on September 29, 2000 (65 FR 58343) revised the description of the Dexter, MO, Class E airspace. An error was inadvertently made in describing the length of the airspace extension. This action corrects the error and confirms the effective date of the direct final rule. After careful review of all available information related to the subject presented above, the FAA has determined that air safety and the public interest require adoption of the rule. The FAA uses the direct final rulemaking procedure for a non-controversial rule where the FAA believes that there will be no adverse

public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on January 25, 2001. No adverse comments were received, and thus this notice confirms that this direct final rule will become effective on that date.

Correction to the Direct Final Rule

Accordingly, pursuant to the authority delegated to me, the Dexter, MO, Class E airspace description as published in the **Federal Register** on September 29, 2000 (65 FR 58343), (**Federal Register** Document 00-24933; page 58344), column 3, is corrected as follows.

§ 71.1 [Corrected]

* * * * *

ACE MO E5 Dexter, MO [Corrected]

By removing "7.4 miles south of the NDB" and substituting "8 miles south of the NDB."

* * * * *

Issued in Kansas City, MO on December 8, 2000.

Herman J. Lyons, Jr.,

Manager, Air Traffic Division, Central Region.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1214

RIN 2700-AC40

Code of Conduct for the International Space Station Crew

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Interim final rule.

SUMMARY: NASA is issuing new regulations entitled "International Space Station Crew," to implement certain provisions of the International Space Station (ISS) Intergovernmental Agreement (IGA) regarding ISS crewmembers' observance of an ISS Code of Conduct.

DATES: *Effective Date:* October 1, 2000.

FOR FURTHER INFORMATION CONTACT: John F. Hall, Jr., Senior Counsel (Commercial and International), 202-358-2432.

SUPPLEMENTARY INFORMATION: On January 29, 1998, the United States formally joined with fourteen nations in an unprecedented international partnership for cooperative space exploration and development, known as the ISS. The Agreement Among the Government of Canada, Governments of Member States of the European Space Agency, the Government of Japan, the Government of the Russian Federation, and the Government of the United States of America Concerning Cooperation on the Civil International Space Station, which forms the foundation of the ISS partnership, provides in Article 11, that each partner,
