SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 14, 2017, FDA published a notice with a 30-day comment period to request comments on abuse potential, actual abuse, medical usefulness, trafficking, and impact of scheduling changes on availability for medical use of 17 drug substances.

The Agency has received requests for an extension of the comment period for the notice. Each request conveyed concern that the current 30-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the notice.

FDA has considered the requests and is extending the comment period for the notice until September 20, 2017. The Agency believes this extension allows adequate time for interested persons to submit comments.

Dated: September 7, 2017.

SUPPLEMENTARY INFORMATION:

I. Background

Section 907 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112-144) (FDASIA) directed the Agency to publish and provide to Congress a report describing the extent to which clinical trial participation and safety and effectiveness data by demographic subgroups, including sex, age, race, and ethnicity, is included in applications submitted to FDA (Ref. 1). Section 907 also directed FDA to publish and provide to Congress an action plan outlining recommendations to improve

the completeness and quality of analyses of data on demographic subgroups in summaries of product safety and effectiveness data and in labeling; on the inclusion of such data, or the lack of availability of such data, in labeling, and to improve the public availability of such data to patients health care providers and researchers, and to indicate the applicability of these recommendations to the types of medical products addressed in section 907. In the Action Plan, FDA committed to developing this guidance as part of the strategy to fulfill FDASIA requirements (Ref. 2).

This guidance outlines FDA’s recommendations and expectations for patient enrollment, data analysis, and reporting of age, race, and ethnicity data in medical device clinical studies. Specific objectives of this guidance are to (1) encourage the collection and consideration of age, race, ethnicity, and associated covariates (e.g., body size, biomarkers, bone density) during the study design stage; (2) outline recommended analyses of study subgroup data with a framework for considering demographic data when interpreting overall study outcomes; and (3) specify FDA’s recommendations for reporting age, race, and ethnicity-specific information in summaries and labeling for approved or cleared medical devices. FDA believes these recommendations will help improve the quality, consistency, and transparency of data regarding the performance of medical devices within specific age, race, and ethnic groups as well as encourage appropriate enrollment of diverse populations including relevant age, race, and ethnic groups. Proper evaluation and reporting of these data can benefit patients, clinicians, researchers, regulators, and other stakeholders.

FDA considered comments received on the draft guidance that appeared in the **Federal Register** of June 20, 2016 (81 FR 39927). FDA revised the guidance as appropriate in response to the comments. This document extends the policy established in FDA’s guidance entitled “Evaluation of Sex-Specific Data in Medical Device Clinical Studies” to additional demographic subgroups of age, race, and ethnicity (Ref. 3).

II. Significance of Guidance

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on “Evaluation and Reporting of Age, Race, and Ethnicity data in Medical Device Clinical

Studies.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>. ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail to the HRSA Information Collection Clearance Officer, 14N39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference, in compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995.

Information Collection Request Title: National Practitioner Data Bank for Adverse Information on Physicians and Other Health Care Practitioners—45 CFR part 60 Regulations and Forms, OMB No. 0915–0126—Revision.

Abstract: This is a request for a revision of OMB approval of the information collection contained in regulations found at 45 CFR part 60 governing the National Practitioner Data Bank (NPDB) and the forms to be used in registering with, reporting information to, and requesting information from the NPDB.

Administrative forms are also included to aid in monitoring compliance with Federal reporting and querying requirements. Responsibility for NPDB implementation and operation resides in HRSA's Bureau of Health Workforce.

The intent of the NPDB is to improve the quality of health care by encouraging hospitals, State licensing boards, professional societies, and other entities providing health care services to identify and discipline those who engage in unprofessional behavior, and to restrict the ability of incompetent health care practitioners, providers, or suppliers to move from State to State without disclosure of previous damaging or incompetent performance. It also serves as a fraud and abuse clearinghouse for the reporting and disclosing of certain final adverse actions (excluding settlements in which no findings of liability have been made) taken against health care practitioners, providers, or suppliers by health plans, Federal agencies, and State agencies.

The reporting forms, request for information forms (query forms), and administrative forms (used to monitor compliance) are accessed, completed, and submitted to the NPDB
