SUPPLEMENTARY INFORMATION: Under the PRA and its implementing regulations (5 CFR part 1320), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information," within the meaning of the PRA, includes agency requests that pose identical questions to, or impose reporting or recording keeping obligations on, ten or more persons, regardless of whether response to such request is mandatory or voluntary. See 5 CFR 1320.3(c); see also 44 U.S.C. 3502(3). Before seeking clearance from OMB, agencies are generally required, among other things, to publish both 60-day and 30-day Notices in the **Federal Register** concerning any proposed information collection—including extension of a previously-approved collection—and provide an opportunity for comment. See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

To comply with this requirement, the Access Board published its 60-day Notice in June 2023. See 88 FR 38015 (June 12, 2023). The Access Board is now publishing this 30-day Notice for the proposed renewal of this information collection. OMB's approval of the current version of the Access Board's Online ABA Complaint Form is set to expire in September 2023.

OMB Control Number: 3014-0012.

Title: Online Architectural Barriers Act (ABA) Complaint Form.

Type of Review: Extension of a currently approved information collection.

Abstract: The Access Board enforces the Architectural Barriers Act of 1968 (ABA) by investigating complaints from members of the public concerning particular buildings or facilities, *i.e.*, those that are: constructed or altered by or on behalf of the United States; leased with Federal funds; or constructed or altered with funds from a Federal grant or loan. Over 90% of complaints the Access Board receives each year are submitted using the standardized, user-friendly, and accessible Online ABA Complaint Form; the remainder are submitted in writing, without the need to use a hard-copy complaint form, by email, mail, or fax. The Online ABA Complaint Form allows complaints to be filed 24 hours per day, seven days per week, and allows for greater efficiency, clarity, and timeliness in the complaint filing process and resolution of complaints.

The Online ABA Complaint Form prompts complainants to provide the

information the Access Board needs to investigate their complaint. First, complainants must complete the form fields for at least the name of the building or facility and the city and state in which it is located. Second, complainants must describe each barrier to accessibility they have found at the building or facility. Third, complainants are given the option, but are not required, to provide personal information, including their name, address, telephone number(s), and email address. Where provided, personal information is not disclosed outside the agency without the written permission of the complainant. Complainants are also given the option to upload electronic files containing pictures, drawings, or other documents relevant to their complaint. Once any additional information and the complaint is submitted, the system provides complainants confirmation that their complaint has been submitted successfully, a complaint number for them to use when making inquiries about the status of their complaint, and an option to print their complaint. Complainants also receive an automatically generated email (if they have provided an email address) confirming the submission of their complaint.

Description of Respondents:

Individual members of the public.

Estimated Total Annual Number of Responses: Approximately 200 individuals submit complaints using the Online ABA Complaint Form each year.

Estimated Frequency of Response: Occasional. Complainants submit one complaint for each building or facility at which they noted accessibility barriers, regardless of the number of barriers encountered.

Estimated Time Burden per Response: On average, about 30 minutes per online complaint; the time burden may vary depending on the number of accessibility barriers identified in a complaint. There is no financial burden on respondents.

Estimated Total Annual Burden Hours: Approximately 100 hours annually.

Request for Comment: Comments are again invited on: (a) whether the proposed collection of information is necessary for performance of the Access Board's work; (b) the accuracy of the estimated burden; (c) ways for the Access Board to enhance the quality, utility, and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. If you wish to comment in response to this Notice, you may send your

comments as specified under the **ADDRESSES** section of this Notice by September 18, 2023.

Christopher Kuczynski,
General Counsel.

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; High-Frequency Surveys Program/Household Pulse Survey

AGENCY: Census Bureau, Department of Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the proposed data collection for the Household Pulse Survey under the High-Frequency Surveys Program, prior to the submission of the information collection request (ICR) to OMB for approval. The Household Pulse Survey was launched on April 23, 2020 with approval from the Office of Management and Budget to continue data collection through October 31, 2023 (OMB No. 0607-1013). The Department of Commerce has decided to continue the Household Pulse Survey after October 31, 2023.

DATES: To ensure consideration, comments regarding the continued Household Pulse Survey information collection must be received on or before October 16, 2023.

ADDRESSES: Interested persons are invited to submit written comments by email to Cassandra Logan, Survey Director, U.S. Census Bureau, by email to Cassandra.Logan@census.gov or PRAComments@doc.gov. Please reference High-Frequency and Rapid Response Surveys/Household Pulse Survey. You may also submit comments, identified by Docket Number USBC-2023-0006, to the Federal e-Rulemaking Portal: <http://www.regulations.gov>. All comments

received are part of the public record. No comments will be posted to <http://www.regulations.gov> for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or specific questions related to collection activities should be directed to Cassandra Logan, Survey Director, U.S. Census Bureau, 4600 Silver Hill Road, HQ-7H157, Washington, DC 20233, (301) 763-1087, and Cassandra.Logan@census.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The High-Frequency Surveys Program was established as a natural progression from the creation of the Household Pulse Survey. High-frequency surveys are designed to develop and deploy data collection instruments quickly and for data to be released in near real-time. The Census Bureau developed the Household Pulse Survey as an experimental endeavor in cooperation with five other federal agencies. The survey was designed to produce near real-time data in a time of urgent and acute need to inform federal and state action. Changes in the measures over time provided insight into individuals' experiences on social and economic dimensions during the period of the Covid-19 pandemic. It has evolved to include content on other emergent social and economic issues facing households. This survey, conducted under the auspices of the Census Bureau's Experimental Data Series (<https://www.census.gov/data/experimental-data-products.html>), is designed to supplement the federal statistical system's traditional benchmark data products with a new data source that provides relevant and timely information based on a high-quality sample frame, data integration, and cooperative expertise.

To date, question domains contributed by the Census Bureau (Census), the Office of Management and Budget (OMB); the U.S. Department of Agriculture's (USDA) Economic Research Service (ERS) and Food and Nutrition Service (FNS); the Bureau of

Labor Statistics (BLS); the Centers for Disease Control and Prevention (CDC) and the National Center for Health Statistics (NCHS); the Health Resources and Services Administration's Maternal and Child Health Bureau (HRSA/MCHB); the National Center for Education Statistics (NCES); the Department of Housing and Urban Development (HUD); the Bureau of Transportation Statistics (BTS); the Department of Defense (DOD); the National Institute on Occupational Safety and Health (NIOSH); the National Center for Immunization and Respiratory Diseases (NCIRD); the U.S. Energy Information Administration (EIA); the White House Council of Economic Advisors (CEA) and Domestic Policy Council (DPC); the Consumer Financial Protection Bureau (CFPB); the Department of Health and Human Services, Assistant Secretary for Planning and Evaluation (HHS/ASPE); and the Food and Drug Administration (FDA) have sought to measure employment status, spending, food security, housing, health, natural disasters, vaccine receipt, COVID-19 diagnosis and treatment, shortage of critical products, disability, income, and childcare arrangements.

In the future, the HPS platform will be used to measure social and economic effects of current events, whether they be health events, natural disaster events, or other social or economic events facing the nation or a significant portion of the nation.

II. Method of Collection

The Census Bureau will conduct this information collection online using Qualtrics as the data collection platform. Qualtrics provides the necessary agility to deploy the Household Pulse Survey quickly and securely. It operates in the Gov Cloud, is FedRAMP authorized at the moderate level, and has an Authority to Operate from the Census Bureau to collect personally identifiable and Title-protected data.

The Census Bureau will sample approximately 1,100,000 housing units for each period of data collection. If approved, the survey will be administered starting on or around November 15, 2023. Households will be contacted via email and SMS message (with the possibility of mailed invitations) and asked to complete approximately 50 questions on topics such as employment status, spending, food security, housing, health, natural disasters, vaccine receipt, COVID-19 diagnosis and treatment, shortage of critical products, disability, income, and childcare arrangements. The time for

survey participants to complete the survey is approximately 20 minutes. As methods develop and questionnaire topics change, the Census Bureau will notify the public via **Federal Register** notices.

Survey estimates will be produced by weighting the results to various demographic controls from auxiliary sources like the Census Bureau official population estimates and the American Community Survey. Source and accuracy documentation will provide details about the methods and quality of the survey estimates for each data collection cycle.
