

Respondents will be persons 16 years or older living in households located throughout the United States sampled for the National Crime Victimization Survey (NCVS). The PPCS will be conducted as a supplement to the NCVS in all sample households for a six (6) month period. The PPCS is one component of the BJS effort to fulfill the mandate set forth by the Violent Crime Control and Law Enforcement Act of 1994 to collect, evaluate, and publish data on the use of excessive force by law enforcement personnel. The goal of the collection is to report national statistics that provide a better understanding of the types, frequency, and outcomes of contacts between the police and the public, public perceptions of police behavior during the contact, and the conditions under which police force may be threatened or used. BJS plans to publish this information in reports and reference it when responding to queries from the U.S. Congress, Executive Office of the President, the U.S. Supreme Court, state officials, international organizations, researchers, students, the media, and others interested in criminal justices statistics.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimate of the total number of respondents is 91,663. About 80% of respondents (73,330) will have no police contact and will complete the short interview with an average burden of three minutes. Among the 20% of respondents (18,333) who experienced police contact, the time to ask the detailed questions regarding the nature of the contact is estimated to take an average of 10 minutes. Respondents will be asked to respond to this survey only once during the six month period. The burden estimate is based on data from prior administrations of the PPCS.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There is an estimated 6,722 total burden hours associated with this collection.
