DATES: The question and answer session will be held via webinar on Tuesday, October 26, 2021, beginning at 5 p.m. For details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: This meeting will be held via webinar and connection and agenda information will be posted at the MAFMC's website: <https://www.mafmc.org/council-events>.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: This is a Council-hosted eVTR question and answer session open to the public and targeted towards commercial operators. Beginning on November 10, 2021, all commercial vessels with federal permits for species managed by the Mid-Atlantic or New England Council will be required to submit vessel trip reports (VTRs) electronically as eVTRs within 48 hours of the end of a trip (unless required sooner as with some sector allocations). This action does not change any other existing requirements associated with VTRs. These changes were recommended by the MAFMC and NEFMC in order to increase the timeliness and availability of data submitted through VTRs, reduce the reporting burden on commercial vessel operators, and increase the accuracy and quality of data. This meeting follows multiple Council held training workshops and will act as an opportunity for follow up questions

regarding using an approved eVTR software application.

I. Background

The Inspector General Act of 1978, as amended, created the Offices of Inspectors General as independent and objective units to conduct and supervise audits and investigations relating to Federal programs and operations. The CIGIE is an interagency council whose executive chair is the Deputy Director for Management, Office of Management and Budget, and is comprised principally of the 75 Inspectors General (IGs).

FOR FURTHER INFORMATION CONTACT: South Atlantic Coastal Study Outreach Lead, Ms. Lisa Clark, at 904–232–2114 or by email at Lisa.M.Clark@usace.army.mil.

SUPPLEMENTARY INFORMATION: Congress authorized and funded the South Atlantic Coastal Study (SACS) in 2016, as Hurricanes Harvey, Irma, and Maria carried particular impact within the area of responsibility of the U.S. Army Corps of Engineers' (USACE) South Atlantic Division. The SACS followed on the heels of the successful completion of the North Atlantic Coast Comprehensive Study, a regional study conducted by

the USACE North Atlantic Division in the wake of the devastation caused by Hurricane Sandy in 2012. The SACS is a comprehensive coastal study focused on managing coastal storm risk to populations, infrastructure, and environmental resources throughout the coastal areas of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Puerto Rico, and the U.S. Virgin Islands. These areas represent approximately 65,000 miles of tidally influenced shoreline. The goals of the SACS, authorized by Section 1204 of the Water Resources Development Act of 2016 (WRDA 2016), are to (1) provide a common operating picture of coastal risk, (2) identify high-risk locations and focus current and future resources, (3) identify and assess risk reduction actions, (4) promote and support resilient coastal communities, (5) promote sustainable projects and programs, and (5) leverage supplemental actions. In addition, the study identifies activities warranting further analysis and institutional barriers to implementation. Although the study also identifies those areas warranting more detailed evaluations, the SACS is not scoped to recommend projects for Congressional authorization or develop detailed project designs. Accordingly, National Environmental Policy Act (NEPA) documentation is not included in the study scope. Full NEPA and other environmental compliance would be accomplished as appropriate as part of future detailed evaluations before any actions could be implemented. The SACS also includes products intended to provide a consistent set of tools to enhance decision-making by all stakeholders. The products include current and projected wave and water elevation data for the study area, coastal Geographic Information Systems (GIS) analyses, economic evaluations, regional sediment management and sand availability determinations, environmental and cultural resource evaluations, and actionable risk reduction strategies in areas with coastal risk. Comments are encouraged on the SACS Draft Report and Appendices; technical SACS products are posted for reference as supporting materials.

In October 2021, the USACE will host virtual public meetings to discuss the report and answer questions. For more information on the virtual public meetings, visit: <https://www.sad.usace.army.mil/SACS/>.
