

proprietary techniques, in lieu of the MPI DSA software, in addition to other proprietary analytics, to help select and determine the allocation of its investments and to define and track the various market factors and relative exposures and to adjust the Fund's portfolio, as necessary, (2) the Sub-Adviser would seek to identify approximately 100, instead of approximately 50, market factors that track the aggregated exposure and approximate the returns of the selected universe of long/short equity hedge funds, and (3) the Fund's portfolio would seek to consist of between 40 and 80, instead of up to 50, Underlying ETPs and other securities. The Commission believes that utilizing certain proposed proprietary techniques, in addition to other proprietary analytics, increasing the number of identifiable market factors to track the aggregated exposure and approximate the returns of the selected universe of long/short equity hedge funds and raising the maximum number of Underlying ETPs and other securities in which the Fund may invest would allow for additional flexibility for the Fund to include a broader and more diversified range of market sectors and securities investments, in furtherance of the Fund's investment objective to seek investment results that exceed the risk adjusted performance of approximately 50% of the long/short equity hedge fund universe, as defined by the HFRI Equity Hedge (Total) Index constituents.¹⁴ In addition, the Exchange represents that, by investing in a broader range of market sectors, the Sub-Adviser may be able to reduce some of the market risk associated with investment in a smaller number of market sectors and reduce price volatility in the Fund's Shares.

The Exchange represents that the Fund's investment objective is not changing, all other representations made in the Prior Release remain unchanged, and the Fund will continue to comply with all of the listing requirements under NYSE Arca Equities Rule 8.600. For the foregoing reasons, the Commission believes that the proposed change does not raise novel or unique regulatory issues and is consistent with the protection of investors and the public interest. Therefore, the Commission waives the 30-day operative delay requirement and designates the proposed rule change as operative upon filing.¹⁵

to prevent the use and dissemination of material, non-public information regarding such portfolio.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.
