

will be used by CISA to track and manage external speaking engagements. The information will also be used to schedule and determine the most appropriate CISA speaker based on date, time, location, presentation format, and topic. The form collects information regarding the requested speaking engagement, *e.g.*, the host organization, the speaking topic, agenda, and additional event details.

The requested information helps CISA determine whether the speaker should attend the engagement and/or how CISA should best prepare for the event. The information is used to determine if accepting the request will further CISA's mission.

The CISA Speakers Bureau team will use the information to identify a speaker and route the Speakers Request Form to that person for consideration. The form will be available on www.cisa.gov as a fillable pdf and/or webform and will be submitted to the CISA External Affairs Speakers Bureau. The data collected will be stored in an internal SharePoint site.

The CISA Speaker Request Form was previously approved by OMB on July 26, 2022, and is set to expire on July 31, 2025.

This is an extension of an existing information collection.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

- (1) Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background

E.O. 14161, "Protecting the United States from Foreign Terrorists and Other National Security and Public Safety Threats," directs implementation of uniform vetting standards and necessitates the collection of all information necessary for a rigorous vetting and screening of all grounds of inadmissibility and removability or bases for the denial of immigration-related benefits. *See* 90 FR 8451 (Jan. 20, 2025). Implementation of the directives provided in the E.O. requires U.S. Citizenship and Immigration Services (USCIS) to collect standard data on immigration forms and/or information collection systems. This data will be collected from certain populations of individuals on applications for immigration-related benefits and is necessary for the enhanced identity verification, vetting, and national security screening and inspection conducted by USCIS and required under the E.O.

This collection of information is necessary to comply with section 2 of the E.O. to establish screening and vetting standards and procedures to enable USCIS to assess an alien's eligibility to receive an immigration-related benefit from USCIS. This data collection is also used to validate an applicant's identity and to help determine whether such grant of a benefit poses a security or public-safety threat to the United States.

USCIS will collect biographic information on immigration information collection instruments and systems. USCIS will update its forms and systems to collect additional information from individuals who seek admissibility or other benefits when that information is not already collected.

New Information To Be Collected

U.S. Government departments and agencies involved in screening and vetting, to include USCIS, identified 24 data elements that would constitute a new baseline threshold of data to be collected for improved identity verification and national security vetting. These 24 core data elements were published in the **Federal Register** at 90 FR 11326 on March 3, 2025. These six (6) new data elements are in addition to and separate from the data elements for which USCIS requested comments in the March 3, 2025, generic clearance notice, but they are also needed for further identification and national security vetting and will be added to certain immigration benefit request forms where the information is not already collected.

The following six (6) data elements are biographic and employment identifiers used to help USCIS confirm both an individual's identity as it relates to the submitted application and to other records. These biographic identifiers are also used by USCIS and screening partners to help confirm or disprove a relevant association between an applicant and information of interest and the strength of that association in the context of the underlying information.

1. Beneficiary/Applicant/Petitioner Social Security Number
2. Family Member (parent(s), spouse, sibling(s), and child(ren)) Social Security Number
3. Business/Employer Name
4. Business/Employer Physical Address
5. Business/Employer Mailing Address
6. Business Federal Employer Identification Number

Applicant information is collected to maintain a record of persons applying for specific immigration benefits, and to help determine whether these applicants are eligible to receive the benefits for which they are applying. The information provided through USCIS forms is also analyzed—along with other information that the Secretary of Homeland Security determines is necessary, including information about other persons included on the USCIS forms—against various security and law enforcement databases to identify those applicants who may pose a security or public-safety risk to the United States.
