DEPARTMENT OF HEALTH AND HUMAN SERVICES**Administration for Children and Families****Proposed Information Collection Activity; Comment Request****Proposed Projects**

Title: Evaluation of the Community Healthy Marriage Initiative.

OMB No. New collection.

Description: The Administration for Children and Families, U.S. Department of Health and Human Services, is conducting a demonstration and evaluation called the Community Healthy Marriage Initiative (CHMI). Demonstration programs are currently funded through child support enforcement waivers authorized under section 1115 of the Social Security Act to support healthy marriage, improve child well-being and increase the financial security of children. The objective of the evaluation is to: (1) Assess the implementation of community interventions designed to provide marriage education by

examining the way the projects operate and by examining child support outcomes among low-income families in the community; and (2) evaluate the community impacts of these interventions on marital stability and satisfaction, child well-being and child support outcomes among low-income families. Primary data for the implementation evaluation will come from observations, interviews, focus groups and records. One-on-one and small group interviews with project staff and marriage education service providers in the community will provide a detailed understanding of the administration and operation of the demonstrations. Focus group discussions will provide insights into participants' perspectives on marriage education and their experiences with the CHMI interventions. This request for comments is for semi-structured interviews and focus groups for the implementation evaluation.

The impact evaluation will be integrated with the implementation study and will assess the effects of healthy marriage initiatives by comparing family- and child well-being outcomes in the CHMI communities with similar outcomes in comparison communities that are well-matched to the project sites. Data from the implementation studies will provide the basis for the instrumental variable models of CHMI impacts to help determine direct or indirect exposure to marriage-related services. At a later date, comments will be sought on information collection for the impact evaluation.

Respondents: Lead Project Staff, Service Provider Organization Staff, Key Community, Civic Stakeholders, and Program Clients.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Average number of responses per respondents	Average burden hours per response	Total burden hours
Administrative interviews	160 40 respondents x 4 sites	2 visits, on average	1	320
