NUCLEAR REGULATORY COMMISSION

[Docket No. 030-04858; NRC-2021-0148]

Dow Corning Corporation; Building DC-3

AGENCY: Nuclear Regulatory
Commission.

ACTION: Environmental assessment and
finding of no significant impact;
issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering approval of an amendment to Materials License 21-08362-08, issued on June 28, 2021 and held by Dow Corning Corporation, to approve the Decommissioning Plan for Building DC-3 and its adjacent areas, located at 2200 West Salzburg Road in Auburn, Michigan. If approved, the licensee would be allowed to implement the proposed Decommissioning Plan for decontamination and remediation of the affected areas of the DC-3 Building site, in order to meet the NRC's criteria for unrestricted use. As part of its review, the NRC conducted an assessment of the environmental impacts of the proposed decommissioning action. This notice provides details regarding the NRC's environmental assessment (EA) and the corresponding finding of no significant impact (FONSI).

DATES: The EA and FONSI referenced in this document are available on December 14, 2021.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of an amendment to Materials License 21-08362-08, issued to Dow Corning Corporation for operation of the Building DC-3, located at 2200 West Salzburg Road, in Bay County, Michigan. The amendment would approve the proposed Decommissioning Plan for the decontamination and remediation of the affected areas of the DC-3 Building site, to meet the NRC's criteria for unrestricted use. Therefore, as required by Section 51.30 of title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental assessment," the NRC performed an EA. Based on the results of the EA, the NRC has determined not to prepare an environmental impact statement (EIS) for the Decommissioning Plan Approval and is issuing a FONSI.

II. Environmental Assessment

Description of the Proposed Action

The proposed action is to amend Materials License 21-08362-08 to incorporate the appropriate and acceptable derived concentration guideline levels into the license and to decontaminate and remediate the affected areas of the DC-3 Building sufficiently to enable unrestricted use of

the facility. The proposed action will allow Dow Corning Corporation to decommission the DC-3 building in accordance with NRC regulations.

The proposed action is in accordance with the licensee's application dated July 24, 2018, as supplemented by letter(s) dated September 10, 2018 and April 22, 2019.

Need for the Proposed Action

The amendment is needed so the licensee can decommission the DC-3 Building site in accordance with 10 CFR 30.36, "Expiration and termination of licenses and decommissioning of sites and separate buildings or outdoor areas," and therefore reduce the residual radioactivity to a level that permits release of the facility for unrestricted use.

Environmental Impacts of the Proposed Action

The NRC staff has assessed the potential environmental impacts from Dow Corning Corporation decommissioning activities. The NRC staff has assessed the impacts of the proposed action on land use, historical and cultural resources; visual and scenic resources; water resources; climatology, meteorology and air quality; socioeconomics; noise; ecology; geology and soil; traffic and transportation; public and occupational health and safety; and waste management, and the approval of the proposed action would not result in an increased radiological risk to public health or the environment.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the "no-action" alternative). With respect to the DC-3 Building site, the no-action alternative would mean that the licensee would not be allowed to conduct decommissioning work.

The no-action alternative is not acceptable because it would put the licensee in violation of the NRC's Timeliness Rule regulations specified in 10 CFR 30.36. The Timeliness Rule requires licensees to decommission and release a licensed site, building, or portions thereof, for unrestricted use in a timely manner when licensed activities have permanently ceased.

Agencies and Persons Consulted

On April 28, 2021, the NRC staff consulted with Michigan Department of Environment, Great Lakes, and Energy, regarding the environmental impact of

the proposed action. The state official concurred with the EA and FONSI.

III. Finding of No Significant Impact

The NRC staff determined that the proposed action complies with the requirements of Subpart E of 10 CFR part 20, "Radiological Criteria for License Termination." Decommissioning of the site to the proposed derived concentration guideline levels will result in reduced residual contamination levels in the

facility, enabling release of the facility for unrestricted use. No significant radiologically contaminated effluents are expected during the decommissioning. Occupational doses to decommissioning workers are expected to be low and well within the limits of 10 CFR part 20. No radiation exposure to any member of the public is expected, and public exposure will therefore also be less than the applicable public exposure limits of 10 CFR part 20.

On the basis of the EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an EIS for the proposed action and a FONSI is appropriate.
