

breadth of activities in testing and certification, OSHA is confident that TUVAM will develop and implement procedures and practices to appropriately perform the activities in the areas noted above.

Therefore, OSHA will impose the three conditions noted above in this final notice. These conditions apply solely to TUVAM's operations as an NRTL and solely to those products that it certifies for purposes of enabling employers to meet OSHA product approval requirements. These three conditions, listed first under Conditions below, are in addition to all other conditions that OSHA normally imposes in its recognition of an organization as an NRTL.

Final Decision and Order

The NRTL Program staff has examined the application, the additional submissions, the on-site review report, and other pertinent documents. Based upon this examination and the program staff recommendation, OSHA finds that TUV America, Inc., has met the requirements of 29 CFR 1910.7 for recognition as a Nationally Recognized Testing Laboratory. The recognition applies to the sites listed above. In addition, it covers the test standards, listed below, and it is subject to the limitations and conditions, also listed below.

Limitations

OSHA hereby limits the recognition of TUVAM to testing and certification of products for demonstration of conformance to the test standards listed below. OSHA has determined that each test standard meets the requirements for an appropriate test standard, within the meaning of 29 CFR 1910.7(c).

- UL 45 Portable Electric Tools
- UL 50 Enclosures for Electrical Equipment
- UL 67 Panelboards
- UL 73 Motor-Operated Appliances
- UL 508 Industrial Control Equipment
- UL 751 Vending Machines
- UL 813 Commercial Audio Equipment
- UL 1004 Electric Motors
- UL 1012 Power Units Other Than Class 2
- UL 1244 Electrical and Electronic Measuring and Testing Equipment
- UL 1950 Technology Equipment Including Electrical Business Equipment
- UL 2601-1 Medical Electrical Equipment, Part 1: General Requirements for Safety
- UL 3101-1 Electrical Equipment for Laboratory Use; Part 1: General Requirements

UL 3111-1 Electrical Measuring and Test Equipment, Part 1: General Requirements

UL 6500 Audio/Video and Musical Instrument Apparatus for Household, Commercial, and Similar General Use

The designations and titles of the above test standards were current at the time of the preparation of the preliminary notice.

The Agency's recognition of TUVAM, or any other NRTL, for a particular test standard is always limited to equipment or materials (products) for which OSHA standards require third party testing and certification before use in the workplace. Conversely, OSHA's recognition of an NRTL for a test standard excludes the testing of any product(s), falling within the scope of the test standard, for which OSHA has no such requirements.

Many of the Underwriters Laboratories (UL) test standards listed above are also approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience in compiling the list, we use the designation of the standards developing organization (e.g., UL 1004) for the standard, as opposed to the ANSI designation (e.g., ANSI/UL 1004). Under our procedures, an NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of whether it is currently recognized for the proprietary or ANSI version. Contact ANSI or the ANSI Web site, <http://www.ansi.org>, and click "NSSL" to find out whether or not a test standard is currently ANSI-approved.

Conditions

TUV Product Services GmbH must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

Within 30 days of certifying its first products under the NRTL Program, TUVAM will notify the OSHA NRTL Program Director so that OSHA may review TUVAM's implementation of its procedures for controlling its US registered certification mark in conjunction with use of this mark by TUV Product Services GmbH of Germany;

Only TUV America, Inc., or TUV Product Services GmbH may authorize the US registered certification mark currently owned by TUVAM, provided each one is recognized as an NRTL by OSHA. TUVAM may authorize the use of this mark, for purposes of its product certifications under the NRTL Program,

only at the TUVAM sites recognized by OSHA;

Prior to conducting inspections of manufacturing facilities based on a frequency of twice per year, OSHA must review and accept the detailed procedures that TUVAM will utilize to determine when to use this frequency for such inspections;

OSHA must be allowed access to TUVAM's facility and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If TUVAM has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the test standard developing organization of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

TUVAM must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, TUVAM agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

TUVAM must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

TUVAM will meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and

TUVAM will continue to meet the requirements for recognition in all areas where it has been recognized.

Signed at Washington, DC, this 17th day of January, 2002.

John L. Henshaw,

Assistant Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (02-008)]

NASA Advisory Committees; Renewal of the Centennial of Flight Commission

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice renewal of the charter of the Centennial of Flight Commission.

SUMMARY: Pursuant to sections 14(b)(1) and 9(c) of the Federal Advisory Committee Act (Pub. L. 92–463), and after consultation with the Committee Management Secretariat, General Services Administration, the Administrator of the National Aeronautics and Space Administration has determined that a renewal of the Centennial of Flight Commission (Commission) is in the public interest in connection with the performance of duties imposed upon NASA by law. The structure and duties of the Commission remain unchanged.

FOR FURTHER INFORMATION CONTACT: Ms. Sharon Foster, Code I, National Aeronautics and Space Administration, Washington, DC 20546, 202/358–1903.

SUPPLEMENTARY INFORMATION: Information regarding the Centennial of Flight Commission is available on the World Wide Web at <http://www.centennialofflight.gov>.

Sylvia K. Kraemer,

*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

BILLING CODE 7510–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–245, 50–336 and 50–423]

Dominion Nuclear Connecticut, Inc.; Millstone Nuclear Power Station, Units 1, 2, and 3 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Facility Operating License No. DPR–21 issued to Dominion Nuclear Connecticut, Inc. (the licensee) for the Millstone Nuclear Power Station, Unit 1, a permanently shutdown nuclear facility located in Waterford, Connecticut, and to Facility Operating License Nos. DPR–65 and NPF–49, issued to Dominion Nuclear Connecticut, Inc., for operation of the Millstone Nuclear Power Station, Units 2 and 3, located in Waterford, Connecticut. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would revise the physical protection (security) related license condition to indicate that the physical security program plans listed may, rather than do, contain safeguards

information; and change the name of the ‘Millstone Nuclear Power Station’ to the ‘Millstone Power Station.’

The proposed action is in accordance with the licensee’s application dated August 8, 2001.

The Need for the Proposed Action

Currently, License Condition 2.C.(4) for Units 1 and 2 and License Condition 2.E for Unit 3, identifies the plans which describe the NRC approved program for physical protection of Millstone Units 1, 2, and 3. They are the Millstone Nuclear Power Station Physical Security Plan, the Millstone Nuclear Power Station Suitability, Training, and Qualification Plan, and the Millstone Nuclear Power Station Safeguards Contingency Plan. License Conditions 2.C.(4) and 2.E also indicate that the plans contain safeguards information protected under 10 CFR 73.21. However, Revision 15 to the Millstone Nuclear Power Station Suitability, Training, and Qualification Plan removed safeguards information to allow declassification of the document. The proposed revision to the license conditions would allow declassification of the document. Additionally, the licensee also proposed the deletion of the word “Nuclear” from the title of the physical security program plans listed under the security related license condition and when it is used in the phrase “Millstone Nuclear Power Station” elsewhere in the operating license. This change is purely administrative and does not alter any regulatory requirements or commitments made by the licensee.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the issuance of the proposed amendment will not have an environmental impact. The proposed changes to the licenses are considered editorial or administrative in nature. The licensee does not propose any changes to structures, systems, components, site boundaries or operational practices.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed

action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resource than those previously considered in the Final Environmental Statement for the Millstone Nuclear Power Station.

Agencies and Persons Consulted

On December 12, 2001, the staff consulted with the State of Connecticut official, Mr. Michael Firsick of the Connecticut Department of Environmental Protection, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee’s letter dated August 8, 2001. Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Public Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail at pdr@nrc.gov.
