Draft Programmatic Environmental Impact Statement/Environmental Impact Report for the San Francisco Estuary Invasive Spartina Project: Spartina Control Program

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The Fish and Wildlife Service (Service) announces availability of the Draft Programmatic Environmental Impact Statement/Environmental Impact Report (Draft EIS/R) for the San Francisco Estuary Invasive Spartina Project: Spartina Control Program. The Draft EIS/R will be available for public comment for a period of 45 days after publication of this Notice of Availability in the **Federal Register**. The Service and the California State Coastal Conservancy jointly prepared the Draft EIS/R to address environmental impacts and benefits of alternatives for the Spartina Control Program and provide for early-stage public involvement, as required under the National Environmental Policy Act (NEPA) and California Environmental Quality Act (CEQA). The Spartina Control Program would attempt to eradicate four species of non-native, invasive perennial cordgrass (genus *Spartina*) in the San Francisco Bay Estuary (Estuary), including the San Francisco Bay National Wildlife Refuge.

Public meetings will be held:

1. April 22, 2003, 6 p.m. to 9 p.m., Fremont, California.

2. April 23, 2003, 6 p.m. to 9 p.m., Oakland, California.

The public comment period for the Draft EIS/R will end June 2, 2003.

ADDRESSES:

SUPPLEMENTARY INFORMATION: Comments must be received by the end of the comment period to be considered during preparation of the Final EIS/R and finalization of the Spartina Control Program. All comments, including names and addresses, will become part of the public record.

The programmatic EIS/R analyzes potential effects of implementing Spartina treatment methods at a generalized, region-wide program level rather than a detailed, individual project level. The purpose of the Spartina Control Program is to arrest and reverse the spread of invasive, non-native cordgrasses (*S. alterniflora*, *S. anglica*, *S. densiflora*, and *S. patens*) in the Estuary to preserve and restore the ecological integrity of its intertidal habitats and estuarine ecosystem.

The Estuary supports a diverse array of native plants and animals, including several Federal and State listed species. Many non-native species of plants and animals have been introduced to the Estuary, and some now threaten to cause fundamental changes in the structure, function, and ecological value of the Estuary's tidal lands.
