Affected entities: Entities potentially affected by this action are those which are awarded contracts supporting the Superfund program.

Title: Conflict of Interest, Rule #1.

Abstract: Contractors performing at Superfund sites will be required to disclose business relationships and corporate affiliations to determine whether EPA's interests are jeopardized by such relationships. Because EPA has the dual responsibility of cleanup and enforcement and because its contractors are often involved in both activities, it is imperative that contractors are free from conflicts of interest so as not to prejudice response and enforcement actions. Contractors will be required to maintain a database of business relationships and report information to EPA on either an annual basis or when each work assignment is issued. Responses to the collection are required prior to award of a contract. Submissions will be protected from public release as Confidential Business Information in accordance with 40 CFR 2.201. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: Public burden is estimated to average 1969 hours per respondent.

Annual EPA number of respondents covered by this collection is estimated to be 90. The total respondent burden hours is estimated to be 177,210. At an average cost of \$110,067.10 for each submission, the annual cost to the respondents is \$9,906,039. The number of respondents may fluctuate in any given year based upon how many contracts are active at the Agency. Nominal capital or start up costs are expected. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: September 3, 2003.

Manager, Policy and Oversight Service Center.
