**SUPPLEMENTARY INFORMATION:** The items of discussion in the committee's agenda are as follows:

#### Tuesday, April 16, 2013, Beginning at 12 p.m.

The Groundfish Oversight Committee will meet to discuss several issues related to the Northeast Multispecies Fishery Management Plan. This will include a report from the Plan Development Team on catch reporting, as well as a progress report on issues

related to the relative stock size of Gulf of Maine and Georges Bank haddock. Council staff will report on the feasibility of and progress on data analysis that would inform the development of Amendment 18. #### Wednesday, April 17, 2013, Beginning at 8:30 a.m.

The Committee will devote the entire day to considering area management options recommended by the Closed Area Technical Team. Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
