Description: Both now and prior to the Telecommunications Act of 1996, the Commission has taken steps to promote universal access to telephone service. In 1987, the Commission, acting on the recommendation of the Separations Joint Board, adopted a monitoring program to address universal service and separations issues raised in CC Docket No. 80–286. Because that monitoring program (and the Monitoring Reports derived from the program) integrated information from all fifty states, Commission and state staff worked closely to prepare accurate and useful analyses. The Monitoring Reports have been and continue to be widely used by the public, state commissions, and industry because they provide valuable information on universal service support in all states. Currently the monitoring program consists of one item. Information on network usage and growth: This information is generally maintained by all companies that settle their accounts with the National Exchange Carriers Association (NECA) on a cost basis. This information is

collected by NECA. The data collected are: local dial equipment minutes, intrastate toll dial equipment minutes, interstate toll dial equipment minutes, total dial equipment minutes, interstate dial equipment minute factors, and interstate access minutes. The monitoring program is necessary for the Commission, the Joint Board, Congress, and the general public to assess the impact of the new universal service support mechanisms. Failure to implement the program would make it impossible to determine the impact of these mechanisms and to assure that the implementation of section 254 fulfills the intent of Congress and furthers the public interest. Obligation to respond: Mandatory.

Public reporting burden for the collections of information are as noted above. Send comments regarding the burden estimates or any other aspect of the collections of information, including suggestions for reducing the burden to Performance Evaluation and Records Management, Washington, DC 20554.
