

webinar and is requesting stakeholder comment on the Standard updates. During the webinar, EPA will give a presentation on the Agency's proposed plans for updating the Standard. After the presentation, there will be time for attendees to ask questions. The Agency will respond to those questions during the webinar and asks for written submission of any comments after the webinar.

C. What should I consider as I prepare my comments for EPA?

1. Submitting CBI.

Do not submit Confidential Business Information (CBI) to EPA through [regulations.gov](https://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Multimedia submissions.

Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system).

3. Tips for preparing your comments.

When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/comments.html>. Please note that once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket.

In addition, information provided in response to this request may result in further programmatic changes based on the comments received. To facilitate commenting, EPA is requesting comment on specific aspects of the changes as indicated in the document titled "Proposed Revisions to EPA's Safer Choice Standard" that is available in the docket. Please identify the topic you are responding to when submitting your comments. Note that you do not need to address every request for comment and may focus on those where you have relevant expertise or experience.

II. Background

A. What is the Safer Choice program?

As part of its environmental mission, the Safer Choice program partners with businesses to help consumers and commercial buyers identify products with safer chemical ingredients, without sacrificing quality or performance. The Safer Choice program certifies products containing ingredients that have met the program's specific and rigorous human health and environmental toxicological criteria. The Safer Choice program allows companies to use its label on certified products that contain safer ingredients and perform, as determined by expert evaluation. The Safer Choice program certification represents a high level of achievement in formulating products that are safer for people and the environment. For more information on the Safer Choice program, please see: <https://www.epa.gov/saferchoice>.

B. What is the DfE program?

The DfE program is a similar program currently used by EPA for the purpose of helping consumers and commercial buyers identify antimicrobial products that meet the health and safety standards of the normal pesticide registration process required by FIFRA as well as meeting the DfE certification criteria (as described in the Safer Choice Standard). For more information on the DfE program, please see: <https://www.epa.gov/pesticide-labels/learn-about-design-environment-dfe-certification>.
