

Nature of Decision To Be Made

The decision to be made is whether to implement the proposed action as described above, to meet the purpose and need for action through some other combination of activities, or take no action at this time.

Scoping Process

This revised notice of intent is not a solicitation for public comment. The comment period for this analysis closed January 8, 2001 and no additional comments will be considered until the draft environmental impact statement is available for public review. The scoping process was used to identify potential issues related to the proposed action, significant issues to be analyzed in depth, alternatives to the proposed action, and potential environmental effects of the proposed action and its alternatives.

Preliminary Issues

Three preliminary issues have been identified: (1) Disturbances by human presence and noise on the trails and roads may adversely impact wildlife species, (2) sounds of motorized vehicles on the trails and roads may have a negative impact on adjacent landowners, and (3) opportunities for recreation may be affected by the trail and road mileage available as well as by the uses allowed on each route.

Comment Requested

This Revised Notice of Intent is not a solicitation for public comment. The comment period for this analysis closed January 8, 2001 and no additional comments will be considered until the draft environmental impact statement is made available for public review.

Early Notice of Importance of Public Participation in Subsequent Environmental Review

A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553

(1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Rural Utilities Service

Information Collection Activity; Comment Request

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, as amended), the Rural Utilities Service (RUS) invites comments on this information collection for which RUS intends to request approval from the Office of Management and Budget (OMB).

DATES: Comments on this notice must be received by February 28, 2003.

FOR FURTHER INFORMATION CONTACT: F. Lamont Heppe, Jr., Program Development & Regulatory Analysis, Rural Utilities Service, USDA, 1400 Independence Ave., SW., STOP 1522, Room 4034 South Building, Washington, DC 20250-1522. Telephone: (202) 720-0736. FAX: (202) 720-4120.

SUPPLEMENTARY INFORMATION:

Title: 7 CFR Part 1755, Telecommunications Standards and Specifications.

OMB Control Number: 0572-New.

Type of Request: New collection.

Abstract: Manufacturers wishing to sell their products to RUS borrowers, request RUS consideration for acceptance of their products and submit data demonstrating their products' compliance with RUS specifications. Compliance with RUS specifications and standards is demonstrated to a large extent via presentation of laboratory tests results and other informational data upon which the determination of acceptability can be made. RUS evaluates this data to determine that the quality of the products is acceptable and that their use will not jeopardize loan security. In the telecommunications program, because of the complex and highly technical nature of equipment, services and system architectures, RUS also requires a manufacturer to demonstrate successful product use in a working telecommunications system.

RUS Bulletin 345-2, establishes Agency policy that materials and equipment purchased by RUS telecommunications borrowers or accepted as contractor-furnished material, must conform to RUS standards and specifications where they have been established and, if included in RUS IP 344-2, "List of Materials Acceptable for Use on Telecommunications Systems of RUS

Borrowers" (List of Materials), must be selected from that list or must have received technical acceptance from RUS.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 20 hour per response.

Respondents: Business or other for-profit and non-profit institutions.

Estimated Number of Respondents: 49.

Estimated Number of Responses per Respondent: 2.

Estimate Total Annual Burden on Respondents: 2,580 hours.

Copies of this information collection can be obtained from Dawn Wolfgang, Program Development and Regulatory Analysis, Rural Utilities Service at (202) 720-0812. Comments are invited on (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumption used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques on other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: December 23, 2002.

Curtis M. Anderson,

Deputy Administrator as Acting Administrator, Rural Utilities Service.
