

capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, in establishing its proposed fee change the Exchange compared its proposed fee increase to that of competitor exchanges' analogous offerings. As noted above, the proposed fee of \$8500 is less than that Nasdaq Stock Market, LLC's and its affiliated exchanges fee \$16,500 for each 10Gbps Ultra fiber connection and \$11,000 per month for each 10 Gbps fiber connection to their respective exchange.

Moreover, the Exchange also points towards the equivalent offering from MIAX Sapphire and its affiliated options exchanges, MIAX Options, MIAX Pearl and MIAX Emerald (collectively, "MIAX Exchanges") which is \$13,500 per port per month. The Exchange reiterates that a single physical port offering from the Exchange offers the ability to connect to the Affiliate Exchanges (equities and options) and the monthly price does not change based on the number of exchanges a participant is connected to. In this case, examining only the Exchange and its options Affiliate Exchanges, (even though the same physical port could also connect to the Exchange's equities Affiliate Exchanges) a participant could purchase a single physical port from the Exchange and access roughly 14% of the U.S. options market for a cost of \$8,500. In contrast, if a participant desired to access all MIAX Exchanges, allowing access to roughly 16% of the U.S. options market, it would cost that participant \$54,000 (\$13,500 per port per month \times 4 MIAX Exchanges).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others
