

of substances in combination with other substances with which they are commonly found. The Food Quality Protection Act (FQPA) of 1996 requires that factors to be considered in establishing, modifying, or revoking tolerances for pesticide chemical residues shall include the available information concerning the cumulative effects of substances that have a common mechanism of toxicity, and combined exposure levels to the substance and other related substances. The FQPA requires that the Administrator of the Environmental Protection Agency consult with the Secretary of the Department of Health and Human Services (which includes ATSDR) in implementing some of the provisions of the act.

To carry out these legislative mandates, ATSDR has developed a chemical mixtures program. As part of the mixtures program, ATSDR developed a guidance manual that outlines the latest methods for mixtures health assessment. In addition, a series of documents called interaction profiles are being developed for certain priority mixtures that are of special concern to ATSDR. The purpose of an interaction profile is to evaluate data on the toxicology of the "whole" priority mixture (if available) and on the joint toxic action of the chemicals in the mixture in order to recommend approaches for the exposure-based assessment of the potential hazard to public health.

All the documents were submitted to both the peer-review and the public review processes. Changes in the documents reflect those addressing reviewers' comments.

The following documents were made available to the public in October 2004.

Document 1

Guidance manual for the assessment of joint toxic action of chemical mixtures.

Document 2

Interaction profile for persistent chemicals found in fish. Chlorinated dibenzo-p-dioxins (CDDs), hexachlorobenzene, dichlorodiphenyl dichloroethane (p,p'-DDE), methyl mercury, and polychlorinated biphenyls (PCBs).

Document 3

Interaction profile for persistent chemicals found in breast milk. Chlorinated dibenzo-p-dioxins (CDDs), hexachlorobenzene, dichlorodiphenyl dichloroethane (p,p'-DDE), methyl mercury, and polychlorinated biphenyls (PCBs).

Document 4

Interaction profile for 1,1,1-trichloroethane, 1,1-dichloroethane, trichloroethylene, and tetrachloroethylene.

Document 5

Interaction profile for benzene, ethylbenzene, toluene, and xylenes (BTEX).

Document 6

Interaction profile for arsenic, cadmium, chromium, and lead.

Document 7

Interaction profile for copper, lead, manganese, and zinc.

Document 8

Interaction profile for cesium, cobalt, polychlorinated biphenyls, strontium, and trichloroethylene.

Document 9

Interaction profile for arsenic, hydrazines, jet fuels, strontium, trichloroethylene.

Document 10

Interaction profile for cyanide, fluoride, nitrate, and uranium.

Two additional Interaction Profiles [Drafts for Public Comments]

Interaction profile for atrazine, deethylatrazine, diazinon, simazine, and nitrate.

Interaction profile for chlorpyrifos, lead, mercury, and methylmercury.
