

Needs and Uses: The Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act directs the Commission to require, no later than 18 months from enactment, all voice service providers to implement STIR/SHAKEN caller ID authentication technology in the internet protocol (IP) portions of their networks and implement an effective caller ID authentication framework in the non-IP portions of their networks. Among other provisions, the TRACED Act also directs the Commission to create extension and exemption mechanisms for voice service providers. On September 29, 2020, the Commission adopted its *Call Authentication Trust Anchor Second Report and Order*. See *Call Authentication Trust Anchor*, WC Docket No. 17–97, Second Report and Order, FCC 20–136 (adopted Sept. 29, 2020). The *Second Report and Order* implemented section 4(b)(1)(B) of the TRACED Act, in part, by requiring a voice service provider maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. The *Second Report and Order* also implemented the extension mechanisms in section 4(b)(5) by, in part, requiring voice service providers to certify that they have either implemented STIR/SHAKEN or a robocall mitigation program. And finally, the *Second Report and Order* completed the implementation of the exemption process of 4(b)(2) by requiring voice service providers file a second certification after June 30, 2021 to verify that they met the criteria to receive their exemption.
