

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing "Rules and Regs" and "Federal Register Documents".

III. Current Actions

Inspection records denote any hazards that were discovered and how the hazards or unsafe conditions were abated. Federal inspectors use the records to ensure that unsafe conditions are identified early and corrected.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Safety Defects, Examination, Correction, and Records.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Safety Defects; Examination, Correction and Records.

OMB Number: 1219-0089.

Number of Respondents: 12,557.

Number of Responses: 11,502,241.

Burden Hours: 1,223,104.

Burden Cost (operating/maintaining): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 4th day of May, 2007.

David L. Meyer,

Director, Office of Administration and Management.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[DOCKET NOS. 50-498 and 50-499]

STP Nuclear Operating Company; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (NRC, the Commission) is considering issuance of amendments to Facility Operating Licenses, numbered NPF-76 and NPF-80, issued to STP Nuclear Operating Company (the licensee) for operation of the South Texas Project, Units 1 and 2, respectively, located in Matagorda County, Texas.

The proposed amendment request would change the name of one licensee, Texas Genco, LP (Texas Genco), to NRG South Texas LP. The name change results from purchase of Texas Genco's parent company by NRG Energy, Inc. as approved by the NRC in January 2006.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed amendment[s] would only change the name of a licensee. The proposed name change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed name change does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed name change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three
