¹ The majority of applicants only need to complete medical examinations, and therefore these forms once. However, medical exams are valid for a period of three to six months from the examination date. information necessary to determine whether refugees or visa applicants have medical conditions affecting the applicant's eligibility for a visa, or affecting the public health and requiring treatment.

Methodology

A panel physician, contracted by the consular post, in accordance with instructions issued by the Centers for Disease Control and Prevention ("CDC"), performs the medical examination of the applicant and completes the forms. Upon completing the applicant's medical examination, the examining panel physician submits a report to the consular officer on the DS-2054, Medical Examination for Immigrant or Refugee Applicant, and associated worksheets. The entire medical package (all forms that comprise the panel physician medical examination) for visa applicants identified by a panel physician as having a CLASS A or CLASS B medical condition is shared with CDC, in paper form or electronically. The only documentation related to the panel physician examination that is not shared with CDC are the X-ray results, which panel physicians provide directly to the applicants and are not a part of the visa package. None of the medical package for visa applicants who are not identified as having a CLASS A or CLASS B medical condition is systematically shared with CDC. On a case by case basis, information from the medical package could be shared with CDC if specific information is necessary for the administration or enforcement of U.S. law, consistent with INA 222(f), 8 U.S.C. 1202(f).

Abstract of Proposed Collection

This electronic collection records medical information necessary to determine whether visa applicants have medical conditions affecting the applicant's eligibility for a visa.

Methodology

Approved panel physicians will be granted access to an eMedical system by the Department to conduct medical examinations for visa eligibility determinations. The pilot program for the eMedical system launched in September 2018. The eMedical system was rolled out in six waves, the first wave of the rollout was in July 2019, and the final wave was in May 2020. Immigrant visa applicants with a completed and submitted DS-260, Application for Immigrant Visa and Alien Registration will have their medical exam results submitted to the Department via the eMedical system. The panel physician will input the exam information into the eMedical portal and it will be transmitted to the Department for visa adjudication and retained in the Department's systems consistent with the Department's record disposition schedule for visas. The entire medical package (all forms that comprise the panel physician medical examination) for visa applicants identified by a panel physician as having a CLASS A or CLASS B medical condition is shared with the Centers for Disease Control and Prevention (CDC), in paper, or electronically.
