

registration number of the aircraft, which contained either the original documents, or certified copies of such documents, submitted for recordation.

In October 1978, following a comprehensive study, it was determined that the aircraft records would be replaced by an updateable microfiche system. It was further determined that effective May 1, 1981, the microfiche would become the official aircraft record.

The updateable microfiche and the equipment required to operate and maintain that system are no longer manufactured. The microfiche system used by the Civil Aviation Registry's Aircraft Registration Branch is no longer supportable. It was determined that the microfiche should be replaced with an electronic records based system. It was further determined that those electronic records would be the official aircraft records of the Civil Aviation Registry's Aircraft Registration Branch.

Effective August 8, 2002, any person requesting a copy of a record will be provided with their choice of either a paper or digital portable document format copy of the electronic record concerning that aircraft.

Issued in Oklahoma City, OK, on August 2, 2002.

Mark D. Lash,

Manager, Civil Aviation Registry.
