

energy use; business and neighborhood disruptions; environmental justice; changes in traffic and pedestrian circulation and congestion; and changes in transit service and patronage. Measures to avoid, minimize, or mitigate any significant adverse impacts will be identified and evaluated.

The methodology for evaluation of impacts will focus on the areas of investigation mentioned above. As the public involvement and agency consultation process proceeds, additional evaluation criteria and impact assessment measures will be included in the analysis. Potential alternatives will be developed to a conceptual level, and will be screened and ranked against these evaluation criteria and local community considerations. Travel time savings, potential for congestion reduction and improved mobility options for Tempe and Chandler residents will be assessed for the transportation alternatives considered. The public involvement program and agency coordination plan discussed below will provide the vehicle through which these evaluation analyses will be conducted.

The regulations implementing NEPA, as well as provisions of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), call for public involvement in the EIS process. Section 6002 of SAFETEA-LU requires that FTA and METRO do the following: (1) Extend an invitation to other Federal and non-Federal agencies and Indian tribes that may have an interest in the proposed project to become "participating agencies"; (2) provide an opportunity for involvement by participating agencies and the public in helping to define the purpose and need for a proposed project, as well as the range of alternatives for consideration in the EIS; and (3) establish a plan for coordinating public and agency participation in and comment on the environmental review process. An invitation to become a participating agency, with the scoping information packet appended, will be extended to other Federal and non-Federal agencies and Indian tribes that may have an interest in the proposed project. It is possible that we may not be able to identify all Federal and non-Federal agencies and Indian tribes that may have such an interest. Any Federal or non-Federal agency or Indian tribe interested in the proposed project that does not receive an invitation to become a participating agency should notify, at the earliest opportunity, the person identified above under **ADDRESSES**.

A public and agency Coordination Plan that includes a comprehensive Public Involvement Program will be created. The Public Involvement Program will include a full range of involvement activities. Activities will include outreach to local and county officials and community and civic groups; a public scoping process to define the issues of concern among all parties interested in the project; organizing periodic meetings with various local agencies, organizations and committees; a public hearing on release of the Draft Environmental Impact Statement (DEIS); and development and distribution of project newsletters. There will be additional opportunities to participate in the scoping process in addition to the public meetings announced in this notice. Specific mechanisms for involvement will be detailed in the Public Involvement Program.

Valley Metro Rail, Inc. (METRO) may seek New Starts funding for the proposed project under 49 U.S.C. 5309 and will therefore be subject to New Starts regulations (49 CFR Part 611). The New Starts regulation requires a planning Alternatives Analysis that leads to the selection of a locally preferred alternative and inclusion of the locally preferred alternative as part of the long-range transportation plan adopted by the Maricopa Association of Governments. The New Starts regulation also requires the submission of certain project-justification information in support of a request to initiate preliminary engineering, and this information is normally developed in conjunction with the NEPA process. Pertinent New Starts evaluation criteria will be included in the Final EIS.

The AA/EIS will be prepared in accordance with NEPA and its implementing regulations issued by the Council on Environmental Quality (40 CFR Parts 1500–1508) and with the FTA/Federal Highway Administration regulations "Environmental Impact and Related Procedures" (23 CFR Part 771). In accordance with 23 CFR 771.105(a) and 771.133, FTA will comply with all Federal environmental laws, regulations, and executive orders applicable to the proposed project during the environmental review process to the maximum extent practicable. These requirements include, but are not limited to, the environmental and public hearing provisions of Federal transit laws (49 U.S.C. 5301(e), 5323(b), and 5324), the project-level air quality conformity regulation of the U.S. Environmental Protection Agency (EPA) (40 CFR part 93), the section 404(b)(1) guidelines of

EPA (40 CFR part 230), the regulation implementing section 106 of the National Historic Preservation Act (36 CFR part 800), the regulation implementing section 7 of the Endangered Species Act (50 CFR part 402), section 4(f) of the Department of Transportation Act (23 CFR 771.135), and Executive Orders 12898 on environmental justice, 11988 on floodplain management and 11990 on wetlands.

Issued on: January 2, 2008.
