

radio licensees and permittees, insofar as some of the proposed changes would require the filing of application forms rather than rulemaking petitions. However, the forms to be filed would be existing FCC application forms with which broadcasters are already familiar, so any additional burdens would be minimal. Additionally, we propose imposing an additional rulemaking fee upon parties seeking to add new allotments to the FM Table of Allotments. We seek comment on the possible cost burden these requirements would place on small entities. Also, we seek comment on whether a special approach toward any possible compliance burdens on small entities might be appropriate.

21. Steps Taken to Minimize Significant Impact on Small Entities, and Significant Alternatives Considered. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities. The Commission seeks comment on procedures to accomplish AM and FM community of license changes that will, in most instances, reduce the burdens on all broadcasters, including small entities, compared to current procedures. The Commission also seeks comment on whether certain aspects of its proposals would change or undermine current policies to limit the relocation of radio stations from small and/or rural communities to communities in or adjacent to urbanized areas. Proposed changes to Commission procedures for adding FM channel allotments to the FM Table of Allotments are designed to make the process faster and more efficient, reducing delays to broadcasters in implementing new radio service. The Commission also proposes requiring that petitioners for new FM channel allotments simultaneously file Form 301, and pay the prescribed filing fee for Form 301. While this requires payment of the filing fee earlier than is the case in current practice, to the extent that petitioners ultimately obtain construction permits for these allotments, it is a fee they would be

required to pay in any event, therefore this requirement should impose a minimal burden on petitioners. To the extent that a rule change proposed herein enables electronic filing of petitions to amend the FM Table of Allotments and comments on such proposals, the Commission believes that such change will reduce burdens on all broadcasters, including small entities, by reducing the time and effort spent in preparing and submitting such documents in hard copy, as is the current practice. The Commission also seeks specific comments on the burden our proposals may have on small broadcasters. There may be unique circumstances these entities may face and we will consider appropriate action for small broadcasters at the time when a Report and Order is considered.

22. Federal Rules Which Duplicate, Overlap, or Conflict With, the Commission's Proposals. None.
