Agricultural Marketing Service

Title: Fruit Crops.

OMB Control Number: 0581–0189.

Summary of Collection: Marketing orders and marketing agreements are authorized by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601–674; Act). This legislation permits the regulation of certain agricultural commodities for the purpose of providing orderly marketing conditions in interstate and intrastate commerce and improving returns to producers. The Act provides in section 608(d)(1) that information necessary to determine the extent to which an order has effectuated the declared policy of the Act shall be furnished at the request of the Secretary of Agriculture (Secretary). Marketing orders and marketing agreements become effective only after public hearings are held in accordance with formal rulemaking procedures specified by the Act. The Federal programs can authorize the issuance of grade, size, quality, maturity and inspection requirements; pack and container requirements; and pooling and volume regulations. Some provide authority for research and development, including paid advertising. Pursuant to section 608(e)(1) of the Act, certain grade and condition requirements are imposed on 14 commodities imported into the United States for which Orders regulate domestic production.

Need and Use of the Information: The information collection requirements in this request are essential to carry out the intent of the Act, to provide the respondents the type of service they request, and to administer the marketing orders. The Agricultural Marketing Service (AMS) requires several forms to be filed to enable the administration of each marketing order. These include forms covering the selection process for industry members to serve on a marketing order's committee or board and ballots used in referenda to amend or continue marketing orders. If this information collection was not conducted, not only would the Secretary lose his ability to administer the marketing orders, but the respective committees also would have no way of monitoring industry compliance with their respective marketing order and agreement. They would also not be able to determine the assessments due from

industry handlers and growers, which would negatively impact any market research and promotion activities.

Description of Respondents: Business or other for-profit; Farms.

Number of Respondents: 21,858.

Frequency of Responses: Recordkeeping; Reporting; on occasion, Quarterly; Biennially; Weekly; Semi-annually; Monthly; Annually.

Total Burden Hours: 6,595.
