

Frequency of Response: On occasion reporting requirements; Third party disclosure.

Total Annual Burden: 647, 675.

Total Annual Costs: None.

Needs and Uses: The First Report and Order, FCC 98–191, in WT Docket No. 96–86, amended service rules to make the spectrum available for licensing public safety entities. To satisfy local and regional needs and preferences, the FCC has required submission of regional plans drafted by planning committees made up of representatives from the public safety community. Creation of these plans necessarily imposes some burden, both on the eligible entities that make their needs known and on planners who seek to accommodate them.

Total Annual Burden: 6,400 hrs.

Total Annual Cost: \$175,000.

Needs and Uses: Under 47 CFR parts 15 and 18 of FCC Rules, certain equipment must comply with FCC technical standards before it can be marketed. Equipment that operates in the licensed service requires FCC authorization under 47 CFR parts 2 and 68. Since its 1998 Report and Order, Docket No. 98–68, the FCC has permitted a private sector firm or “Telecommunications Certification Body” (TCB) to approve equipment for marketing and has also established guidelines for “Mutual Recognition Agreements” with foreign trade partners. Once approved by the accrediting body and “designated” by the FCC, TCBs may accept Form 731 filings and evaluate the equipment’s compliance with FCC Rules and technical standards. TCBs submit this information to the FCC via the Internet. On September 13, 2001, the FCC adopted a First Report and Order, ET Docket No. 00–47, that established a “Class III Permissive Change” to permit manufacturers to make changes affecting frequency, power, and modulation parameters of “software defined radios” without having to file a new equipment authorization application. The

manufacturer must submit a description of the software changes to the FCC or a designated TCB. The FCC permits “electronic labeling” to be used on software defined radio transmitters.
