ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2024–0480; FRL–12783–01–R10]

Air Plan Approval; OR; Update to Materials Incorporated by Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: The Environmental Protection Agency (EPA) is updating the materials that are incorporated by reference (IBR) into the Oregon State Implementation Plan (SIP). The regulations affected by this update have been previously submitted by Oregon and approved by the EPA. In this final rule, the EPA is also notifying the public of corrections and clarifying changes in the Code of Federal Regulations (CFR) tables that identify the materials incorporated by reference into the Oregon SIP. This update affects the materials that are available for public inspection at the National Archives and Records Administration (NARA) and the EPA Regional Office.

DATES: This action is effective August 7, 2025.

ADDRESSES: The SIP materials for which incorporation by reference into 40 CFR part 52 is finalized through this action are available for inspection at the following locations: Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Suite 155, Seattle, WA 98101; and www.regulations.gov. To view the materials at the Region 10 Office, the EPA requests that you email the contact listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Claudia Vaupel, EPA Region 10, 1200 Sixth Avenue—Suite 155, Seattle, WA 98101, at 206-553-6121, or vaupel.claudia@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Each State has a SIP containing the control measures and strategies used to attain and maintain the national ambient air quality standards (NAAQS). The SIP is extensive, containing such elements as air pollution regulations, emissions inventories, monitoring networks, attainment demonstrations, and enforcement mechanisms, among other elements. In developing the SIP, the State formally adopts the control measures and strategies used to attain and maintain the NAAQS and submits them to the EPA for review and approval.¹ The EPA approves the State's submitted regulatory provisions and codifies them in part 52, "Approval and Promulgation of Implementation Plans," of Title 40 of the Code of Federal Regulations (40 CFR part 52). In codifying the State regulatory provisions, the full text is not

reproduced in its entirety in 40 CFR part 52 but is "incorporated by reference" as of a specific effective date. The public is referred to the location of the full text version for the specifics of each State regulatory provision incorporated by reference into the SIP. The information provided allows the EPA and the public to monitor the extent to which a State implements and enforces the SIP.

The SIP is a living document that is revised by the State as necessary to address the unique air pollution problems in the State. A SIP revision may include changes to one or more regulations in their entirety, or portions of regulations. The State indicates the changes in the submitted SIP revision (such as by using redline/strikethrough text) and the EPA takes action on the requested changes. The EPA establishes a docket for each action using a unique Docket Identification Number, listed in each **Federal Register** document. The docket and complete submission are available for viewing on www.regulations.gov.

On May 22, 1997 (62 FR 27968), the EPA began implementing revised procedures for incorporating regulatory provisions by reference into the Code of Federal Regulations for each SIP. The revised procedures updated the format for the identification of each SIP in 40 CFR part 52, streamlined the mechanism for announcing EPA approval of SIP revisions, and streamlined the mechanism for updating the "IBR material" (the full text of the regulatory provisions and source-specific permits, etc.) incorporated by reference into each SIP in 40 CFR part 52. The revised procedures also called for the EPA to maintain a "SIP Compilation" of the IBR material for each State.

The EPA must update each SIP Compilation and periodically publish an informational document in the rules section of the **Federal Register** notifying the public that updates have been made to a SIP Compilation for a particular State. The EPA began applying the 1997 revised procedures to the Oregon SIP on December 10, 2013 (78 FR 74012). The EPA subsequently published updates to the Oregon SIP IBR materials on April 10, 2019 (84 FR 14272) and December 20, 2022 (87 FR 77720).

A. Approved and Incorporated by Reference Regulatory Materials

Since the last published update to the Oregon SIP IBR materials, the EPA took two actions, on July 23, 2024 (89 FR 59610) and October 8, 2024 (89 FR 81361), to approve and incorporate by reference a number of regulatory provisions into the Oregon SIP at 40

CFR 52.1970(c) and (d). The approval actions and associated regulatory provisions are described in the following paragraphs of this preamble.

B. Regulatory Materials Removed From Incorporation by Reference

Since the last published update to the Oregon SIP IBR materials, the EPA also removed regulatory materials from the Oregon SIP at 40 CFR 52.1970(c). II. EPA Action

In this action, the EPA is providing notification of an update to the materials incorporated by reference into the Oregon SIP as of June 1, 2025, and identified in 40 CFR 52.1970(c) and (d). This update includes SIP materials submitted by Oregon and approved by

the EPA since the last IBR update. *See* 87 FR 77720 (December 20, 2022).

In addition, the EPA is providing notification of the following corrections:

40 CFR 52.1970(c): correcting entry “629–048–0110” to reflect that a revision to this regulation was approved in the EPA action on May 25, 2021 (86 FR 27976); and

40 CFR 52.1970(e): correcting the entry for “ODEQ Continuous Emissions Monitoring Manual” in Table 5 to include the statewide applicable geographic area, which was inadvertently left blank in the action on October 11, 2017 (82 FR 47122).

III. Good Cause Exemption

The EPA has determined that this action falls under the “good cause” exemption in section 553(b)(3)(B) of the Administrative Procedure Act (APA) which, upon finding “good cause,” authorizes agencies to dispense with public participation and section 553(d)(3) which allows an agency to make an action effective immediately (thereby avoiding the 30-day delayed effective date otherwise provided for in the APA). This administrative action simply codifies provisions which are already in effect as a matter of law in Federal and approved State programs, makes corrections and clarifying changes to the tables in the CFR, and makes ministerial changes to the prefatory heading to the tables in the CFR. Under section 553 of the APA, an agency may find good cause where procedures are “impracticable, unnecessary, or contrary to the public interest.” Public comment for this administrative action is “unnecessary” and “contrary to the public interest” since the codification (and corrections) only reflect existing law. Immediate notice of this action in the **Federal Register** benefits the public by providing the public notification of the updated Oregon SIP Compilation and notification of corrections to the Oregon “Identification of Plan” portion of the CFR. Further, pursuant to section 553(d)(3), making this action immediately effective benefits the public by immediately updating both the SIP Compilation and the CFR “Identification of plan” section (which includes table entry corrections).

IV. Incorporation by Reference

In this document, The EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, The EPA is finalizing the incorporation by reference of regulations promulgated by Oregon, previously approved by the EPA and

federally effective before June 1, 2025, contained in Volume I, 40 CFR 52.1970(c), *EPA approved regulations and statutes*, and Volume II, 40 CFR 52.1970(d) *EPA approved state source-specific requirements*, described in section II. of this preamble. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not subject to Executive Order 14192 (90 FR 9065, February 6, 2025) because SIP actions are exempt from review under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because

application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 6, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)
