

Transmittal No. 07-05

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act, as amended

Annex
Item No. vii

(vii) Sensitivity of Technology:

1. The General Electric F110-GE129 engine is releasable to the Kingdom of Saudi Arabia (KSA). No design and manufacturing data, hot section data/drawings, and Full Authority Digital Electronic Engine Control design, development, fabrication, application software definition or overhaul technology are to be released. Proprietary data will be releasable only with manufacturer's consent. Re-engineering of parts is not authorized. Maintenance is limited to removing, replacing, and patching specific non-hot section engine components. Supporting drawings, procedures, equipment and training required to return unserviceable equipment to operational condition is authorized. Disclosure of data is limited to country specific program requirements. Performance data will be in tabular look-up format. Flight and Test data will be in "met/not met, or exceeding specification requirements" format.

2. The Pratt & Whitney F100-PW-229 engine was previously released to the KSA as part of the F-15S system. There is no sensitivity of technology associated with the additional engine core sales in accordance with the previously approved sale criteria.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used in the development of a system with similar or advanced capabilities.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Pakistan – Harris High Frequency//Very High Frequency Radio Systems

The Government of Pakistan has requested a possible sale of Harris High Frequency/Very High Frequency radio systems, which include 1,558 20-Watt High Frequency (HF) Man Packs, 2,188 20-Watt HF Vehicular Systems, 175 150-Watt HF Vehicular Systems, ancillary equipment, spare and repairs parts, support equipment, personnel training and training equipment, publications, U.S. Government and contractor engineering and logistics services and other related elements of program support. The estimated cost is \$160 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that continues to be a key ally in the global war on terrorism.

The radios will enable Pakistan to improve on its capability to provide current and updated intelligence between patrols and higher headquarters. Also, the radios will increase interoperability between Pakistan and the U.S. and coalition forces assisting in the efforts to curtail and eliminate terrorist activities. Pakistan will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Harris Corporation in Rochester, New York. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of a contractor field service representative for up to two years to Pakistan. In addition, two contractor representatives will provide training and several U.S. Government and contractor representatives will participate in program management and technical reviews for up to four weeks.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
