#### SUPPLEMENTARY INFORMATION:

##### Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B) and (d)(3), the Coast Guard finds that good cause exists for not publishing an NPRM and for making this regulation effective less than 30 days after publication in the **Federal Register**. Publishing an NPRM and delaying its effective date would be contrary to public interest, since immediate action is needed to protect mariners on the Anacostia River against potential hazards associated with fireworks displays, such as the accidental discharge of fireworks and falling hot embers or other debris.

##### Request for Comments

Although we did not publish a notice of proposed rulemaking, we encourage you to participate in this rulemaking by submitting comments and related materials. If you do so, please include your name and address, identify the docket number for this rulemaking (USCG-2008-0338), indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the effective period. We may change this rule in view of them.

##### Background and Purpose

Fireworks displays are frequently held from locations on or near the navigable waters of the United States. The accidental discharge of fireworks and falling hot embers or other debris are a safety concern during such events. The Coast Guard has the authority to impose appropriate controls on marine events that may pose a threat to persons, vessels and facilities under its jurisdiction. The purpose of this rule is to promote maritime safety, and to protect mariners transiting the area from the potential hazards associated with a fireworks display. The rule is needed to
