Source material is uranium and thorium or ores containing uranium and thorium in concentrations greater than 0.05 percent by weight of the uranium or thorium. In addition, the proposed amendments modify the existing possession and use requirements for the general license in § 40.22 to better align the requirements with current health and safety standards. Finally, the proposed amendments revise, clarify, or delete certain licensing exemptions (also known as "unimportant quantities") in order to make the requirements for those exemptions more risk informed.
