

estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to efficiencies gained from the use of EPA's modernized Assessment and Total Maximum Daily Load Tracking and Implementation System (ATTAINS) database and the integration of EPA's data and information systems to better support reporting, tracking water quality protection, and restoration actions. These efficiencies streamlined water quality assessment and reporting by reducing paper copy transactions and improving electronic data exchange.

Abstract: The National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321-4347 establishes a national policy for the environment. The Council on Environmental Quality (CEQ) oversees the NEPA implementation. CEQ's Regulations at 40 CFR parts 1500 through 1508 set the standard for NEPA compliance. They also require agencies to establish their own NEPA implementing procedures. The EPA's procedures for implementing NEPA are found in 40 CFR part 6. Through this

part, the EPA adopted the CEQ Regulations and supplemented those regulations for actions proposed by the EPA that are subject to NEPA requirements. The EPA actions subject to NEPA include the award of wastewater treatment construction grants under section 201 of the Clean Water Act, the EPA's issuance of new source National Pollutant Discharge Elimination System (NPDES) permits under section 402 of the Clean Water Act, certain research and development projects, the EPA actions involving renovations or new construction of EPA facilities, and certain grants awarded for projects authorized by Congress through the agency's annual appropriations act. The EPA is collecting information from certain applicants as part of the process of complying with either NEPA or Executive Order 12114 ("Environmental Effects Abroad of Major Federal Actions"). The EPA's NEPA regulations apply to actions of the EPA that are subject to NEPA in order to ensure that environmental information is available to the agency's decision-makers and the public before decisions are made and before actions are taken. When the EPA conducts an environmental assessment pursuant to its Executive Order 12114 procedures, the agency generally follows its NEPA procedures. Compliance with the procedures is the responsibility of the EPA's Responsible Officials, and for applicant proposed actions applicants may be required to provide environmental information to the EPA as part of the environmental review process. For this ICR, applicant-proposed projects subject to either NEPA or Executive Order 12114 (and that are not addressed in other EPA programs' ICRs) are addressed through the NEPA process.

Form Numbers: None.

Respondents/affected entities: Certain grant or permit applicants who must submit environmental information documentation to the EPA for their projects to comply with NEPA or Executive Order 12114, including Wastewater Treatment Construction Grants Program facilities funded under section 201 of the Clean Water Act, State and Tribal Assistance Grant recipients, and new source NPDES permittees.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 516 (total).

Frequency of response: On occasion.

Total estimated burden: 73,800 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$6,259,214 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 66,240 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an adjustment change in the size of the respondent universe due to the return of congressional earmarks in the EPA annual appropriations act.
