*Abstract:* This ICR renewal is for the final rule, *Accidental Release Prevention Requirements; Risk Management Programs Under the Clean Air Act Section 112(r)(7); Distribution of Off-Site Consequence Analysis Information*. CAA section 112(r)(7) required EPA to promulgate reasonable regulations and appropriate guidance to provide for the prevention and detection of accidental releases and for responses to such releases. The regulations include requirements for submittal of a risk management plan (RMP) to EPA. The RMP includes information on off-site consequence analyses (OCA) as well as other required program elements.

The Chemical Safety Information, Site Security, and Fuels Regulatory Relief Act (CSISSFRA) required the President

to promulgate regulations on the distribution of OCA information (CAA section 112(r)(7)(H)(ii)). The President delegated this responsibility to EPA and the Department of Justice (DOJ). The final rule, published on August 4, 2000 (65 FR 48108), imposed minimal information and recordkeeping requirements.

In accordance with the final rule, the Federal Government established 55 reading rooms at Federal facilities geographically distributed across the United States and its territories. At these reading rooms, members of the public are able to read, but not mechanically copy or remove, paper copies of OCA information for up to 10 stationary sources per calendar month. Members of the public may also have access to OCA information that the Local Emergency Planning Committee (LEPC) in whose jurisdiction the person lives or works, is authorized to provide. The final rule also authorizes and encourages state and local government officials to have access to OCA information for their official use.

EPA also established a Vulnerable Zone Indicator System (VZIS) which informs any person located in any state whether an address specified by that person might be within the vulnerable zone of one or more stationary sources, according to the data reported in RMPs. The VZIS is available on the internet or through a request through regular mail to the EPA.

The burden estimates, numbers and types of respondents, wage rates and unit and total costs for this ICR renewal will be revised and updated, if needed, during the 60-day comment period while the ICR Supporting Statement is undergoing review at OMB.

*Form numbers:* None.

*Respondents/affected entities:* State and local agencies and the public.

*Respondent's obligation to respond:* Required to obtain or retain a benefit (40 CFR part 1400).

*Estimated number of respondents:* 377 (total).

*Frequency of response:* As necessary.

*Total estimated burden:* 665 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$35,637 (per year), includes \$95 annualized capital or operation & maintenance costs.

*Changes in the estimates:* Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section

when the updated ICR Supporting Statement is completed.
