Agenda: On May 10 and 11, 2012, the committee will discuss general issues related to medical devices intended for obese patients. The committee will provide recommendations regarding trial design for clinical studies to evaluate the safety and effectiveness of weight loss devices placed either endoscopically (balloons and suture devices) or laparoscopically (bands, space-occupying devices, etc.) and contrast those to surgery. Additional discussion will include issues pertaining to clinically meaningful weight loss, when the primary endpoint should be measured, length of patient followup, and how much risk is acceptable for a potentially small amount of weight loss.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee link.

If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by April 20, 2012.
