

Multispecies Fishery Management Plan (FW 47) and other issues. During its deliberations the Committee will consider the advice of the Groundfish Advisory Panel and the Recreational Advisory Panel. FW 47 will modify specifications for the fishery and consider changes to accountability measures, as well as adjust other measures. Changes to the specifications could include the adoption of sub-annual catch limits that limit the catches of Southern New England/Mid-Atlantic Bight (SNE/MAB) windowpane and/or SNE winter flounder by the scallop fishery, and SNE/MAB windowpane by other fisheries. The Committee will review draft FW 47 and may develop recommendations for preferred alternatives that will be presented to the Council. The Committee will review groundfish management priorities for 2012 and will develop a Committee recommendation on these priorities. The Committee will also consider information from a sector review workshop planned for October and may prioritize the issues identified at the workshop that need to be addressed to improve sector performance. Finally, the Committee will develop advice on any accountability measures that may be needed for the recreational fishery (indications are that an AM will be needed for Gulf of Maine haddock). Committee recommendations will be presented to the Council etc. Other business may be discussed.

Although non-emergency issues not contained in this agenda may come before these groups for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard (see ADDRESSES), at least 5 working days prior to the meeting date.

United States Patent and Trademark Office

[Docket No. PTO-C-2011-0056]

Request for Comments on Intellectual Property Enforcement in China

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Request for written submissions from the public.

SUMMARY: As China has become a major trading partner for the United States, U.S. rights holders are increasingly seeking to protect and enforce their intellectual property (IP) in that country. China's patent and trademark offices are now among the largest in the world in terms of filings, and its IP enforcement system is being increasingly utilized by U.S. rights holders. Ensuring that the Chinese IP system works in a fair and timely manner for U.S. innovators is a top priority for the U.S. Government.

To that end, the United States Patent and Trademark Office (USPTO), in collaboration with other U.S. Government agencies, is leading an effort to identify and assess the challenges U.S. inventors are facing with China's judicial and administrative patent enforcement systems. The USPTO would like to address the concerns of rights holders by working with them to identify problems—such as difficulties in gathering evidence, meeting evidentiary requirements, protecting proprietary information, obtaining adequate damages, and enforcing preliminary injunctions—to then find ways to address these issues with the Chinese Government.

As part of this effort, the USPTO, in coordination with the White House Intellectual Property Enforcement Coordinator (IPEC), has conducted a series of roundtables to obtain the views of diverse members of the patent community who have first-hand experience enforcing their patents in China. Roundtables were held on July 19, 2011, in Washington, DC; on July 26, 2011, in Beijing, China; on July 29, 2011, in Shanghai, China; and on August 1, 2011, in Guangzhou, China.
