SUPPLEMENTARY INFORMATION: On June 3, 2020, the U.S. Copyright Office issued a notice of inquiry (“NOI”) commencing a policy study on state sovereign immunity from copyright infringement suits.¹ Congress has requested that the Office “research this issue to determine whether there is sufficient basis for federal legislation abrogating State sovereign immunity when States infringe copyrights.”² To assist Congress in making that assessment, the Office solicited public comment on several issues concerning the degree to which copyright owners face infringement from state actors today, whether such infringement is based on intentional or reckless conduct, and what remedies, if any, are available to copyright owners under state law.

To ensure that members of the public have sufficient time to comment, and to ensure that the Office has the benefit of a complete record, the Office is extending the deadline for the submission of comments to 11:59 p.m. Eastern Time on September 2, 2020.

The Office has also determined that interested parties should be given an opportunity to address any comments submitted in response to the NOI. In addition, as noted in the NOI,³ the Office is seeking to provide sufficient time for parties engaged in empirical research in this area to complete and submit their findings. Accordingly, the Office is providing for a second round of written comments. Additional comments must be submitted no later than October 2, 2020. In general, these comments should be limited to issues or concerns presented in the initial comments. The Office will, however, consider any empirical research submitted by the October 2 deadline as part of the record in this proceeding.

Dated: June 22, 2020.

SUPPLEMENTARY INFORMATION: On January 31, 2020, the U.S. Department of Health and Human Services declared a public health emergency (PHE) for the United States to aid the nation’s healthcare community in responding to the Coronavirus Disease 2019 (COVID–19). On March 11, 2020, the COVID–19 outbreak was characterized as a pandemic by the World Health Organization.

As discussed during a public meeting held on March 20, 2020, with nuclear industry representatives and members of the public, this is an unprecedented time for our country, the NRC, and its regulated entities. The NRC is committed to following the NRC’s Principles of Good Regulation (independence, openness, efficiency, clarity, and reliability) while performing our mission. In keeping with these principles, the NRC is providing additional flexibility by creating an online submission form licensees may use to request relief in the form of alternatives under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.55a(z), “Alternatives to codes and standards requirements,” from certain NRC regulatory requirements in 10 CFR 50.55a(b) through (h).

Alternatives to the requirements of paragraphs (b) through (h) of this section or portions thereof may be used when authorized by the Director, Office of Nuclear Reactor Regulation. A proposed alternative must be submitted and authorized prior to implementation. The applicant or licensee must demonstrate that:

- (1) Acceptable level of quality and safety. The proposed alternative would provide an acceptable level of quality and safety; or
- (2) Hardship without a compensating increase in quality and safety. Compliance with the specified requirements of this section would result in hardship or unusual difficulty without a compensating increase in the level of quality and safety.
