

NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular modification request would be appropriate.

Comments may also be submitted by facsimile at (301)427-2521, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period.

Comments may also be submitted by e-mail. The mailbox address for providing e-mail comments is *NMFS.Pr1Comments@noaa.gov*. Include in the subject line of the e-mail comment the following document identifier: File No. 1506.

FOR FURTHER INFORMATION CONTACT:

Amy Hapeman or Kate Swails,
(301)713-2289.

SUPPLEMENTARY INFORMATION: The subject modification to Permit No. 1506, issued on March 23, 2005 (70 FR 20530) is requested under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Permit No. 1506-01 authorizes the permit holder to study neonate and juvenile loggerhead (*Caretta caretta*), green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*) and leatherback (*Dermochelys coriacea*) sea turtles in the waters of the Gulf of Mexico and the Atlantic Ocean off the coast of Florida. The purpose of the research is to identify developmental habitat, evaluate the extent of ingestion of marine debris, and provide insight into juvenile sea turtle movements and dive patterns. Dr. Witherington may capture up to 250 loggerhead, 100 green, 50 hawksbill, 50 Kemp's ridley, and 10 leatherback sea turtles by handheld dip nets annually. All turtles are measured and released. A subset of green and loggerhead turtles may be transported to a lab and examined with high resolution magnetic resonance interferometry or computerized tomography, held for 3-4 days and released to determine their level of anthropogenic debris ingestion. Annually, four of each species of green, hawksbill, and Kemp's ridley sea turtles may have sonic transmitters and data loggers attached to measure movements and dive patterns, be recaptured after 24 hours to remove the transmitter and released.

The permit holder requests authorization to annually flipper tag and passive integrated transponder tag all

captured sea turtles, biopsy sample up to 100 loggerhead, 100 green, and 50 hawksbill sea turtles, and lavage up to 50 loggerhead, 50 green, 50 hawksbill, 50 Kemp's ridley, and 10 leatherback sea turtles. The permit holder also requests authorization to attach harnessed satellite transmitters to 10 Kemp's ridley sea turtles each year. Imaging activities and attachment of sonic transmitters and data loggers would no longer be authorized for any species. No increase in the total number of turtles taken would be authorized. These additional activities would provide information on the genetic origin, diet, movement, and dive patterns of sea turtles in this area. The amendment would be valid until the permit expires on March 31, 2010.

Dated: November 21, 2008.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XL78

Marine Mammals; File No. 764-1703-02

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit amendment.

SUMMARY: Notice is hereby given that the National Museum of Natural History, Smithsonian Institution, Washington, D.C. 20008-2598 [Principal Investigator: Charles Potter], has been issued an amendment to scientific research Permit No. 764-1703-01.

ADDRESSES: The amendment and related documents are available for review upon written request or by appointment in the following office:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521.

FOR FURTHER INFORMATION CONTACT:

Jennifer Skidmore or Amy Sloan
(301)713-2289.

SUPPLEMENTARY INFORMATION: The requested permit amendment has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the

regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

The Permit authorizes the National Museum of Natural History to collect, obtain, and import/export samples taken from marine mammals of the Orders Pinnipedia (except walrus) and Cetacea for research purposes. This amendment extends the expiration date of the permit to December 31, 2009.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Issuance of this permit, as required by the ESA, was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: November 19, 2008.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
