**SUPPLEMENTARY INFORMATION:** The Job Openings and Labor Turnover Survey (JOLTS) collects data on job vacancies, labor hires, and labor separations. The data can be used as demand-side indicators of labor shortages. These indicators of labor shortages at the national level greatly enhance policy makers' understanding of imbalances between the demand and supply of labor. Presently there is no other economic indicator of labor demand with which to assess the presence of labor shortages in the U.S. labor market. The availability of unfilled jobs is an important measure of tightness of job markets, symmetrical to unemployment measures. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on July 1, 2022 (87 FR 39565).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (See 29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (See 29 U.S.C. 657).

The Standard on Dipping and Coating Operations (29 CFR 1910.126(g)(4)) requires employers to post a conspicuous sign near each piece of electrostatic detearing equipment that

notifies employees of the minimum safe distance they must maintain between goods undergoing electrostatic detearing and the electrodes or conductors of the equipment used in the process. Doing so reduces the likelihood of igniting the explosive chemicals used in electrostatic detearing operations.

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirement is necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirement, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply. For example, by using automated or other technological information collection and transmission techniques.

## III. Proposed Actions

The agency is requesting to retain its previous burden hour estimate of one (1) hour contained in the Standard on Additional Requirements for Special Dipping and Coating Operations (Dip Tanks) (29 CFR 1910.126(g)(4)). There are no program changes or adjustments associated with the information collection requirement in the standard. The agency has correspondingly adjusted the per response burden to maintain a time burden as close as is possible to the actual time of one (1) hour.

OSHA has determined that where electrostatic equipment is being used, the information has already been ascertained and that the "safe distance" has been displayed on a sign in a permanent manner. The agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

*Type of Review:* Extension of a currently approved information collection.

*Title:* Additional Requirements for Special Dipping and Coating Operations (Dip Tanks) (29 CFR 1910.126(g)(4)).

*OMB Control Number:* 1218-0237.

*Affected Public:* Business or other for-profits; Federal Government; State, Local, or Tribal Government.

*Number of Respondents:* 10.

*Frequency of Recordkeeping:* On occasion.

*Total Responses:* 10.

*Average Time per Response:* 0.

*Estimated Total Burden Hours:* 1.  
*Estimated Cost (Operation and Maintenance):* \$0.

All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA-2010-0020). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or a facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**).
