A. Purpose

The information relative to the place of performance and owner of plant or facility, if other than the prospective contractor, is a basic requirement when contracting for supplies or services (including construction). This information is instrumental in determining bidder responsibility, responsiveness, and price reasonableness. A prospective contractor must affirmatively demonstrate its responsibility. Hence, the Government must be apprised of this information prior to award. The contracting officer must know the place

of performance and the owner of the plant or facility to (1) determine bidder responsibility; (2) determine price reasonableness; (3) conduct plant or source inspections; and (4) determine whether the prospective contractor is a manufacturer or a regular dealer. The information is used to determine the firm's eligibility for awards and to assure proper preparation of the contract. Contractors can complete the provision electronically in the On-Line Representation and Certifications Application (ORCA); however, because the data being collected could change for a specific solicitation, contractors will still be required to submit place of performance information on an exceptional basis; that is, whenever the place of performance for a specific solicitation is different from the place of performance shown in ORCA.
