SUPPLEMENTARY INFORMATION: On September 22, 2021 (86 FR 52593), the NRC published a direct final rule amending its regulations in part 52 of title 10 of the *Code of Federal Regulations* to update the design to reflect changes provided by Westinghouse Electric Company LLC and to extend the duration of the AP1000 design certification for an additional 5 years.

The NRC received and docketed three comment submissions on the companion proposed rule (86 FR 52619; September 22, 2021). Electronic copies of the comments can be obtained from the Federal rulemaking website <https://www.regulations.gov> under Docket ID NRC–2020–0269 and are also available in ADAMS under Accession Nos. ML21280A348, ML21293A316, and ML21293A315.

In the direct final rule, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on December 6,

2021. The NRC received three comment submissions. The NRC evaluated the submissions against the criteria described in the direct final rule and determined that the comments were not significant and adverse or were outside the scope of the direct final rule. Specifically, one comment submission was from an Indian Tribe, and it requested no further consultation on this project. A second comment submission agreed with this rulemaking and, thus, was not adverse. The third comment submission did not provide any comment for the NRC to consider. Therefore, the direct final rule will become effective as scheduled.

Dated: November 12, 2021.

For the Nuclear Regulatory Commission.

Angella M. Love Blair,

Acting Chief, Regulatory Analysis and Rulemaking Support Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
