Acting under the authority of and in accordance with section 1(b) of Executive Order 13224 of September 23, 2001, as amended by Executive Order 13268 of July 2, 2002, and Executive Order 13284 of January 23, 2003, I hereby determine that the individual known as Denis Cuspert, also known as Denis Mamadou Cuspert, also known as Abu Mamadou, also known as Abu Talha the German, also known as Abu Maleeq, also known as Abu Maliq, also known as Abu Malik, also known as Abu Maleeq al-Mujaheed, also known as

Federal Transit Administration

[Docket No. FTA–2014–0009]

National Transit Database: Safety Information Collection

AGENCY: Federal Transit Administration, DOT.

ACTION: Final Guidance to the Safety & Security Module in the National Transit Database (NTD) Reporting Manual for Safety Information Collection.

SUMMARY: This notice conveys the Federal Transit Administration’s (FTA) response to comments received regarding proposed revisions to the Safety & Security Module in the National Transit Database (NTD) Reporting Manual for Safety Information Collection.

DATES: *Effective Dates:* The revisions to the NTD Reporting Manual Safety & Security Module will become effective for the 2015 calendar year reporting cycle.

FOR FURTHER INFORMATION CONTACT:

Keith R. Gates, National Transit Database Program Manager, (202) 366–1794, Office of Budget and Policy, Federal Transit Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE., East Building, Washington, DC 20590 or email: keith.gates@dot.gov.

SUPPLEMENTARY INFORMATION

I. Overview

FTA is updating the Safety & Security Module in the National Transit Database Reporting Manual in order to better align NTD safety data collection with data that is collected in the State Safety Oversight (SSO) program Rail Transit Event Database.

On August 21, 2014, FTA issued a notice of request for comments for proposed revisions of the National Transit Database Safety Information Collection, in the **Federal Register** (79 FR 49557, <http://www.gpo.gov/fdsys/pkg/FR-2014-08-21/pdf/2014-19787.pdf>). The comment period closed on October 20, 2014. FTA received a total of 37 comments from 12 stakeholders, including 10 public transportation providers, one trade association, and one individual. This notice addresses comments received and explains the revisions FTA is making to the NTD Reporting Manual. An overview of the comments and the FTA responses are provided below.

II. Response to Comments

Commenters recommended that both FTA and the SSO agencies should use the same database and that reports sent to the SSO, FTA, and the Federal Railroad Administration (FRA) should be collected and maintained on one standard reporting form that meets the needs of all agencies then disseminated to other agencies as required from the assigned federal agency.

While FTA notes the revisions we propose are meant to be a step in that direction, the primary motive for the revisions will align the NTD reporting thresholds and definitions with those of the SSO Program database, allowing the NTD and the SSO Program to share reports and simplify reporting requirements. Additionally, FRA’s regulatory responsibilities have historically differed from those of FTA. FTA also received comments that safety professionals cannot find statistics that are based on data provided to the NTD and the SSO Rail Transit Event Database. These commenters questioned FTA’s need for collecting more data and asserted that FTA does not do anything visible with the data it collects. The NTD produces a monthly time series of safety data that is used extensively by the rail transit industry. The FTA has new safety authority pursuant to MAP–21, and as a result its Office of Transit Safety and Oversight (TSO) now has additional staff and resources that is developing a more active program going forward. In the future, we will use the data collected to produce regular

products and reports for use by the safety community.

1. Reportable Event (clarification)

Incidents reported to the NTD and the SSO Rail Transit Event Database will be called “events.” FTA suggested this change because other uses of the term “incident” are defined as an occurrence that is less severe than an accident or imply a security event. “Event” in this case is intended to include planned and unplanned events that are required to be reported to the NTD. This change is necessary to provide better alignment with nomenclature used by other transportation modes, and to provide clarity during data analysis conducted to identify safety trends.

Comment. One commenter disagreed with the “events” classification and stated that there would continue to be room for confusion with FRA’s definition of “incident.”

FTA Response. FTA is primarily concerned with using terminology that is compatible with usage in the SSO Program. “Event” is the blanket term for accidents and other incidents that are not accidental (such as suicides). Since the NTD also collects information on security events, and such usage is compatible with the Department of Homeland Security (DHS) definition, FTA intends to proceed with this proposed revision.

2. Change in Location Criteria

The NTD currently includes events that are “related to or affect revenue service.” Consistent with data reported to the SSO Program, FTA proposed to revise these applicability criteria to “an event occurring on transit right-of-way, in a transit revenue facility, in a transit maintenance facility, or involving a transit revenue vehicle, excluding occupational safety events occurring in administrative buildings.” Application of these new criteria would mean that recipients will no longer report events at bus stops that are not on property owned or controlled by the agency, unless the event involves a transit vehicle, or boarding/alighting from a transit vehicle.

Comment. FTA received eight comments to the proposed revision. Commenters expressed concern that changing “affecting revenue service standard” to a “location-based standard” would include a number of occupational safety events that are normally reported to the Occupational Safety & Health Administration (OSHA). Many commenters noted that these events are already reported to OSHA, and that this proposed revision would require agencies to file multiple reports
