Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. Licensees file surrenders of authorizations with the Commission on a voluntary basis. This information is used by Commission staff to issue Public Notices to announce the surrenders of authorization to the general public. The Commission's release of Public Notices is critical to keeping the general public abreast of the licensees' discontinuance of telecommunications services.

Without this collection of information, licensees would be required to submit surrenders of authorizations to the Commission by letter which is more time consuming than submitting such requests to the Commission electronically. In addition, Commission staff would spend an extensive amount of time processing surrenders of authorizations received by letter. The collection of information saves time for both licensees and Commission staff since they are received in IBFS electronically and include only the information that is essential to process the requests in a timely manner. Furthermore, the E-filing module expedites the Commission staff's announcement of surrenders of authorizations via Public Notice.
