SUPPLEMENTARY INFORMATION:

I. Abstract

The Treaty on Fisheries Between the Governments of Certain Pacific Island States and the Government of the United States, signed in Port Moresby, Papua New Guinea, in 1987, and its annexes, schedules and implementing agreements, as amended (Treaty), authorize U.S. tuna vessels to fish within fishing zones of a large region of the Pacific Ocean. The South Pacific Tuna Act (16 U.S.C. 973g and 973f) and

U.S. implementing regulations (50 CFR 282.3 and 282.5) authorize the collection of information from participants in the Treaty fishery.

Vessel operators who wish to participate in the Treaty fishery must submit annual license and registration applications and periodic written reports of catch and unloading of fish from a licensed vessel. The information collected is submitted to the Forum Fisheries Agency (FFA) through the U.S. government (National Marine Fisheries Service). License and registration application information is used by FFA to determine the operational capability and financial responsibility of a vessel operator interested in participating in the Treaty fishery. Information obtained from vessel catch and unloading reports is used by FFA to assess fishing effort and fishery resources in the region and to track the amount of fish caught within each Pacific island state's exclusive economic zone for fair disbursement of Treaty monies. If the information is not collected, the U.S. government will not meet its obligations under the Treaty, and the lack of fishing information will result in poor management of the fishery resources.

II. Method of Collection

The information is collected using forms required under the Treaty.
