

7400.11B is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11B lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 by amending the Class E airspace extending upward from 700 feet above the surface to within a 6.6-mile radius (decreased from a 6.7-mile radius) at Halliburton Field, Duncan, OK, and removing the extension to the north of the airport associated with the Halliburton Field Localizer. This proposal would add an extension within 4 miles each side of the 359° bearing from the airport from the 6.6-mile radius to 11.6 miles north of the airport. The geographic coordinates of the airport would also be updated to coincide with the FAA's aeronautical database, and the name of the city associated with the airport in the airspace description would be removed to comply with a change to FAA Order 7400.2L, Procedures for Handling Airspace Matters.

This action is necessary due to an airspace review caused by the decommissioning of the Duncan VOR as part of the VOR MON Program and cancellation of the associated instrument procedures.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11B, dated August 3, 2017, and effective September 15, 2017, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

[Docket No. FDA–2014–F–0469]

Excentials B.V.; Withdrawal of Food Additive Petition (Animal Use)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification; withdrawal of petition for rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a food additive petition (animal use) proposing that the food additive regulations be amended to provide for the safe use of L-selenomethionine as a dietary source of selenium in feed for poultry, swine, and ruminants.

DATES: The food additive petition was withdrawn on November 10, 2017.

ADDRESSES: For access to the docket, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts; and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
