

A proposed rule change filed under Rule 19b-4(f)(6) normally does not become operative for 30 days after the date of filing. Pursuant to Rule 19b-4(f)(6)(iii), however, the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.¹⁷ The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it will allow the Exchange to immediately conform its rules to corresponding FINRA rules. This will ensure that such EDGX rules will continue to be covered by the existing 17d-2 Agreement between the Exchange and FINRA. As noted by the Exchange, amending EDGX Rule 3.5 would harmonize Exchange and FINRA rules of similar purpose reducing duplicative regulation of Common Members. In addition, the Commission believes that the repeal of Rule 3.20 would eliminate an unnecessary rule from the Exchange's rulebook. Accordingly, the Commission hereby grants the Exchange's request and waives the 30-day operative delay.¹⁸

At any time within sixty (60) days of the filing of such proposed rule change, the Commission may summarily temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Exchange Act.

date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange satisfied this requirement.

¹⁷ 17 CFR 240.19b-4(f)(6)(iii).

¹⁸ For purposes of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition and capital formation. See 15 U.S.C. 78c(f).

The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulations (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) how to enhance the quality, utility, and clarity of the information to be collected; and (iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. Physical Fitness and Driving Performance

Type of Request—New information collection requirement.

OMB Clearance Number—None.

Form Number—NHTSA Form 1227.

Requested Expiration Date of Approval—3 years from date of approval.

Summary of the Collection of Information—The National Highway Traffic Safety Administration (NHTSA)

proposes to collect information from licensed drivers about their driving habits, and levels of physical activity in order to determine whether they are eligible to participate in a study of the effects of physical activity on driving performance. Study participation will be voluntary and solicited among residents of one or more planned communities in the vicinity of Chapel Hill, North Carolina. Solicitations will be in the form of flyers posted at a community center, and/or announcements in newsletters and on community listserves, and/or sign-ups at a weekly farmer's market and other local events. Interested residents will contact a designated staff member through a toll-free number to enroll. During a brief telephone pre-screening, a project assistant will explain inclusion and exclusion criteria for study participation. Candidate participants who meet inclusion criteria will respond to a telephone questionnaire to allow researchers to gauge activity and fitness level.

A project assistant will make appointments to visit each enrollee to obtain his/her signature on the informed consent agreement, answer questions about study participation and provide the subject with a physical activity monitoring device. The remaining data necessary for this study will be collected by the physical activity monitoring device, a driving performance assessment conducted by a driving rehabilitation specialist, and an in-vehicle data collection system. The in-vehicle system will include a device to collect the vehicle's Global Positioning System coordinates and a companion device to capture an image of the driver to confirm that the driver for each trip is the study participant.

Description of the Need for the Information and Proposed Use of the Information—NHTSA was established to reduce the number of deaths, injuries, and economic losses resulting from motor vehicle crashes on the Nation's highways. As part of this statutory mandate, NHTSA is authorized to conduct research as a foundation for the development of motor vehicle standards and traffic safety programs.

Previous research indicates that gains in physical fitness improve a number of functional abilities important for safe driving. NHTSA needs to learn more about these relationships between fitness/activity and driving performance to support the development of recommendations and educational/outreach materials aimed at older driver safety. The proposed screening questions and questions about fitness and activity level will allow research
