

Exchange at Camp Parks. The ROD selects the Accelerated Modernization Alternative, under which the construction of new facilities and ranges included in the RPMP would be partially funded using the value of the land exchange (180 acres of the southern cantonment area) from Federal to private ownership. The remainder of RPMP construction at Camp Parks would be programmed as military construction projects. NASA's in-holding would be sold and proceeds of the sale would be used at its NASA-Ames Research Center, Moffett Field. This decision will speed the replacement of antiquated facilities and infrastructure on Camp Parks.

ADDRESSES: Questions regarding this action can be directed to: U.S. Army Garrison Camp Parks, Environmental Office, Building 791 5th Street, Dublin, CA 94568-5201.

I. Background

The Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) and the DOE Organization Act (42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) under Section 3507(a) of the Paperwork Reduction Act of 1995.

DOE's Office of Fossil Energy (FE) is delegated the authority to regulate natural gas imports and exports under
