SUPPLEMENTARY INFORMATION:

I. The Citizen Petition

CSPI, in a citizen petition filed on August 4, 1999, requested that the agency establish a DRV of 40 grams for added sugars and require the declaration of added sugars in nutrition

labeling in both grams per serving and a corresponding percent Daily Value. CSPI also requested that FDA define nutrient content claims for added sugars. Finally, CSPI requested that, when nutrient content or health claims are made about a food, meal product, or main dish product, FDA set, in addition to the limits on other nutrients described in the current regulations, limits and require disclosure of the total amount of added sugars for these claims.

CSPI's ground for its petition is that the labeling provision for added sugars is necessary as a public health measure to give consumers the tools they need to reduce their intake of added sugars. CSPI states in the petition that based on U.S. Department of Agriculture (USDA) data, the per capita consumption of added sugars has risen 28 percent since 1983, and that, in some people, diets with large amounts of added sugars contribute to obesity, the prevalence of which has risen dramatically in the last two decades in both youths and adults. CSPI also asserts that diets with added sugars, from such foods as soft drinks, fruit drinks, candy, cakes, and cookies, include fewer healthier foods that provide nutrients that reduce the risk of osteoporosis, cancer, heart disease, stroke, and other health problems. In addition, CSPI states that frequent consumption of foods with added sugars promotes tooth decay.

CSPI asserts that it is impossible for consumers to determine how much sugar has been added to foods such as yogurt, ice cream, fruit snacks, and juice drinks using current labels. In addition, CSPI states that current labels fail to inform consumers about the proportion of a reasonable day's intake of added sugars that a serving of food provides. CSPI maintains that, although USDA provided quantitative dietary recommendations for added sugars in The Food Guide Pyramid, without labeling of added sugars, it is difficult for consumers to follow such recommendations. USDA's quantitative recommendation serves as the basis for CSPI's request for a DRV of 40 grams for added sugars.

II. FDA Background

FDA addressed comments on added sugars in the January 6, 1993, final rule entitled "Food Labeling: Mandatory Status of Nutrition Labeling and Nutrient Content Revision, Format for Nutrition Label" (58 FR 2079). Comments had recommended mandatory declaration of added sugars only, rather than total sugars, in nutrition labeling and either mandatory or voluntary declaration of both added
