7. Social Security Administration Health IT Partner Program Assessment—Participating Facilities and Available Content Form—20 CFR 404.1614 and 416.1014—0960-0798. The Health Information Technology for Economic and Clinical Health (HITECH) Act promotes the adoption and meaningful use of health information technology (IT), particularly in the context of working with government agencies. Similarly, Section 3004 of the Public Health Service Act requires health care providers or health insurance issuers with government contracts to implement, acquire, or

upgrade their health IT systems and products to meet adopted standards and implementation specifications. To support expansion of SSA's health IT initiative as defined under HITECH, SSA developed Form SSA-680, the Health IT Partner Program Assessment—participating Facilities and Available Content Form. The SSA-680 allows healthcare providers to provide the information that SSA needs to determine their ability to exchange health information with us electronically. We evaluate potential partners (*i.e.*, healthcare providers and organizations) on: (1) the accessibility of

health information they possess; and (2) the content value of their electronic health records' systems for our disability adjudication processes. SSA reviews the completeness of organizations' SSA-680 responses as one part of our careful analysis of their readiness to enter a health IT partnership with us. The respondents are healthcare providers and organizations exchanging information with the agency.

Type of Request: Revision of an OMB-approved information collection.
