RIN 3150–A111

Revisions to Transportation Safety Requirements and Harmonization With International Atomic Energy Agency Transportation Requirements; Corrections

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule; correcting amendments.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) published a final rule in the **Federal Register** on June 12, 2015, in consultation with the U.S. Department of Transportation (DOT), amending its regulations for the packaging and transportation of

radioactive material. These amendments made conforming changes to the NRC’s regulations based on the International Atomic Energy Agency’s 2009 standards for the international transportation of radioactive material and maintain consistency with the DOT’s regulations. The final rule contained minor editorial errors in a calculation, outdated contact information, and outdated information for examining the materials that are incorporated by reference. This document corrects the final rule by revising the definition that contains these errors, and updates the contact and examination information.

DATES: This rule is effective on August 14, 2015.

SUPPLEMENTARY INFORMATION: The NRC published a final rule in the **Federal Register** on June 12, 2015 (80 FR 33987), effective July 13, 2015, amending its regulations in part 71 of Title 10 of the *Code of Federal Regulations* (10 CFR) for the packaging and transportation of radioactive material. These amendments made conforming changes to the NRC’s regulations based on the International Atomic Energy Agency’s 2009 standards for the international transportation of radioactive material and maintain consistency with the DOT’s regulations. The final rule contained minor editorial errors in the definition of *Contamination* that was added to 10 CFR 71.4, “Definitions,” and contained outdated information for the contact for the rule and for examining the materials that are incorporated by reference. This document corrects the final rule by revising the calculation contained in the definition of *Contamination*, and updates the contact information in the **FOR FURTHER INFORMATION CONTACT** section of the final rule’s preamble. This document also updates the examination information by referencing the NRC Technical Library in Section XVII, Incorporation by Reference under 1 CFR part 51—Reasonable Availability to Interested Parties, of the final rule’s preamble. Similarly, the new 10 CFR 71.70, “Incorporations by reference,” is corrected to reference the NRC Technical Library.

Rulemaking Procedure

Under the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive the normal notice and comment requirements if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on the amendments because they will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections related only to management, organization, procedure, and practice. Specifically, these amendments are to correct editorial errors. These amendments do not
