

readily available way of identifying "re-disputed" items, then neither would the contractor.

More generally, staff sees no basis for restricting the study to the reports of consumers who have never disputed any item prior to the study. It is possible that the accuracy of credit reports may differ based on items that have, or have not been, disputed. In light of this, staff plans to include a question in the study about whether consumers have disputed any item in one of their credit reports at an earlier time, and if so, to briefly indicate when and what. But a currently alleged error need not be related to a prior dispute, and we do not see any justification for excluding all consumers who have disputed some item(s) in the past. Staff adds that an important element of both the initial and proposed pilot study is that any contractor must have the expertise to evaluate alleged errors and to assess whether a dispute would be material to creditworthiness. In this context, it is very unlikely that frivolous or immaterial disputes would go forward.

2. Estimated Hours Burden

Consumer participation in the follow-up pilot study would involve an initial screening and any subsequent time spent by participants to understand, review, and if deemed necessary, to dispute information in their credit reports. The FTC staff estimates that up to 800 consumers may need to be screened through telephone interviews to obtain 120 participants, and that a screening interview may last up to 10 minutes, yielding a total of approximately 133 hours (800 screening interviews \times 1/6 hour per contact).

With respect to the hours spent by study participants, in some cases the relative simplicity of a credit report may render little need for review and the consumer's participation may only be an hour. For reports that involve difficulties, it may require a number of hours for the participant to be educated about the report and to resolve any disputed items. For items that are disputed, the participant must submit a dispute form, identify the nature of the problem, present verification from the consumer's own records to the extent possible, and perhaps submit further information. As was true of the initial study, FTC staff again estimates the participants' time for reviewing their credit reports at an average of 5 hours per participant, resulting in a total of 600 hours (5 hours \times 120 participants).²⁴

²⁴ This estimate is given for the purpose of calculating burden under the PRA. Information contained in the contractor's report regarding the

Total consumer burden hours are thus approximately 750 hours (derived as 133 screening hours plus 600 participant hours, further rounding upwards to the nearest 50 hours).

3. Estimated Cost Burden

The cost per participant should be negligible. Participation is voluntary, and will not require any start-up, capital, or labor expenditures by study participants. As with the initial study, participants will not pay for their credit reports or credit scores.

General Counsel.

initial study may indicate a somewhat lower estimate of the average time spent by the 30 participants, but it would not render a noticeably different result for the overall consumer burden. In an effort not to underestimate the time spent by additional study participants, FTC staff has retained the estimate used for the initial study.
