The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request*: The applicant proposes a temporary variance from the target water surface elevation requirements of Article 401 of the license (181.8 ± 0.5 feet Plant Datum which is 0.37 foot above mean sea level) to facilitate a scheduled drawdown of the project impoundment, Lake Worth. The purpose of the drawdown is to provide for installation of new shoreline structures and maintenance of existing shoreline structures. The licensee will lower Lake Worth approximately 3.5 feet from the lower limit of the normal target elevation range, 181.3 feet, to an elevation of 177.8 ± 0.5 feet. The drawdown is scheduled to begin on September 27, 2022, and the licensee

proposes to utilize a drawdown rate of one half-foot per day. The licensee anticipates reaching the target drawdown elevation of 177.8 feet on October 3, 2022 and remain at the target drawdown elevation for four weeks. The licensee plans to begin refilling Lake Worth on November 1, 2022. The licensee states that the completion of refilling the reservoir would be dependent on precipitation and the releases from the upstream Lake Blackshear Hydroelectric Project No. 659. The licensee will continue to operate to comply with Article 401 run-of-river operations requirement when it reaches the target drawdown elevation of 177.8 feet.
